REPORT ON PUBLIC INSTRUCTION IN BOMBAY, 1914-15.

I.—UNIVERSITY AND COLLEGIATE EDUCATION.

University.—The regulations were revised in respect of the rules of debate, University prizes and scholarships, the examinations in Commerce, the dates of terms and examinations, and minor matters. Mr. Y. K. Kuntay, B.A., who was deputed to England to study the theory and practice of library administration, took charge of the library in January 1915; its wooden furniture has been replaced by more convenient steel furniture at a cost of nearly Rs. 30,000. The experiment of giving lectures on the M.A. courses in history, economics, philosophy, Sanskrit, and Persian through University lecturers appointed by the Senate, tried for the first time in the monsoon term of 1914, was so far successful that it was decided to repeat it in 1915-16. On the other hand no success has so far attended the efforts in England of Lord Sydenham, Sir Alfred Hopkinson, and Dr. F. G. Selby to obtain suitable persons as University Readers, or as University Professor of Economics and Sociology (a post for the maintenance of which the Government of India have made a recurring grant of Rs. 12,000). The extension of the existing University buildings was twice considered by the Senate, and detailed plans and estimates are now being prepared by the Consulting Architect to Government. The provisional affiliation of the Government College of Commerce (now called Sydenham College of Commerce and Economics) has been made permanent.

2. The November examinations were held for the last time in 1914, the transition to the new academic year (in which the examinations will be held regularly in March) being facilitated by the holding of a series of supplementary examinations in March 1915. The months of January and February with ten days of March 1915 were constituted a supplementary term, intermediate between the old year ending in September 1914 and the new year commencing in June 1915; for this abbreviated term only half fees were charged. As the results of the supplementary examinations were published after the close of the year under report, they are not taken into account here.

3. The number appearing for the Matriculation examination in November 1914 increased from 4,823 to 5,258, while the number passing fell from 2,792 to 1,329. The proportion of successful candidates thus fell from 58 to 25 per cent. of the total, a fluctuation which gave rise to some comment. The Syndicate subsequently declared 265 more to have passed, bringing the total up to 1,594, or 30 per cent. of the whole. The loudest complaints, however, were directed at the inequality of results at different centres, the worst being those achieved at Belgaum. The Syndicate had indeed framed instructions for the guidance of the examiners with the special object of diminishing the element of chance in the examination of the English papers, and meeting complaints as to the lack of uniformity of standard; but as the results proved disappointing, revised instructions were issued for the supplementary examination in March 1915, which are believed to have removed the principal causes of complaint. It seems to have been insufficiently noticed that a large number of ill-prepared candidates were sent up in November, not merely on account of the lax results of the preceding year, but because otherwise they would have had to wait till March 1916; and an examiner noted at Ahmedabad that at least 400 of the candidates at that centre were quite unfit to appear. The public are perhaps unaware, too, of a circumstance which tends to bring down the results at the Belgaum centre. This is the influx of weak candidates from the adjoining territories of Mysore or Madras; one school alone sent up over sixty of such candidates, of whom *only one* passed. It is however interesting to note that at the School Final examination of November 1914 the Dhárwár centre showed by far the worst results. There is therefore some ground for supposing that

the efficiency of the teaching in some parts of the southern division is not what it might be. For the first time the University examiners were required to submit reports on the general character of the work examined by them, and these reports dwell on its slovenliness and inaccuracy. Of the cause of this there can be no doubt; boys who are permitted to fill their notebooks with slovenly, ill-written, uncorrected work all the year round naturally offer the same kind of work at the examination. It is worthy of note that the Ratnágiri high school passed 19 candidates out of 21, and the Basel German Mission high school at Dhárwár 3 out of 96.

4. In the seven Government and aided arts colleges the number who appeared for the first year examination was 1,947, of whom 982 secured a certificate; this gives a percentage of 50 against one of 62 in the preceding year. In order to secure that this examination should not fall below the standard of the former Previous Examination, and that the tests applied by various colleges should not lead to material differences in the results, the Syndicate now call for and scrutinize certain statistical information in a prescribed form.

5. The Intermediate Examination in Arts was held under the new regulations for the first time; of 1,185 who appeared 787 passed, or 66 per cent. The candidates are now allowed an option between logic and mathematics; in the seven colleges 572 preferred the former and 191 the latter.

6. The B.A. examination was held under both the old and the new regulations, the latter for the first time; in November 448 passed out of 798, or a percentage of 56. The new regulations provide for both honours and pass courses, but owing to ambiguities, which are to be removed, the declaration of the results was not altogether satisfactory in respect of those who appeared for honours but were allowed to pass only. From the statements submitted by the seven colleges it appears that under the old regulations 251 appeared and 112 passed (44 per cent.); under the new out of 146 Honours candidates 105 passed (72 per cent.), and out of 275 Pass candidates 161 passed (58 per cent.). Of the Honours candidates 9 obtained a first class, and 44 a second. The number appearing for the B.Sc. fell from 33 to 32, of whom 26 passed; the number appearing for the M.A. increased from 78 to 111, of whom 62 passed.

7. **Arts Colleges.**—The total number of students in the seven colleges was 3,475; Fergusson College had 1,046, Wilson 770, St. Xavier's 525, Gujarát 414, Elphinstone 274, Deccan 244, and Sind 202. Owing to the different character of the Matriculation results the numbers of freshmen admitted were not nearly so large as in the preceding year; they ranged from 255 at Fergusson College to 52 at Sind College. Out of the 1,594 candidates who passed the Matriculation in November only 1,070 are thus accounted for. If we take the number of candidates sent up for the Honours B.A., and the percentage who secured a first or second class, the colleges stand in the following order:—Elphinstone 64, St. Xavier's 59, Gujarát 57, Sind 40, Fergusson 31, Wilson 20 and Deccan 15.

8. Elphinstone College was in charge of Mr. Wilkinson throughout the year. Monsieur Peltier had to proceed to France on the outbreak of war in August 1914; Mr. Dalal, the librarian, very kindly undertook his work without remuneration in addition to his own duties until January, when Mr. V. G. Rao was appointed. Professor S. R. Bhandarkar retired in March and was succeeded in the Sanskrit chair by Mr. V. S. Ghate. The number on the roll declined from 357 to 274, of whom 15 were ladies. For the B.A. honours examination 25 appeared, of whom 2 obtained a first class and 14 a second; 8 passed only, and 1 failed. For the pass examination 22 appeared and 11 passed. The supplementary term was partly used for special work of various kinds, and for the senior classes Professors Muller, Anderson, Sisson, Colvile and Marrs co-operated in a scheme of lectures dealing with the period 1789—1832 from various points of view. The discussions that took place at the end of each lecture served to stimulate general interest in the course, and the experiment as a whole was an unqualified success. As to the scholarship reserved for Maráthas the principal reports that the scholar of 1910 failed at the end of the year and did not rejoin; the scholar of 1911 failed in all subjects at the end of the year; the

scholar of 1912 and 1913 did well in the Previous and Intermediate examinations, but collapsed entirely in the B.A.; the scholar of 1914 is at present doing well. On the whole there has been no real competition for the Maratha scholarships, with the result that in three cases they have been awarded to students unlikely to complete their University career. Two small parties were taken on tour, one by Professor Muller to places of interest in connection with Maratha history; the other by Mr. Kanga to works of scientific interest at Jabalpur, Calcutta, Allahabad and Kalimati. Minor improvements were carried out at the hostel, which extends its hospitality also to some students of the College of Commerce and of the Law School. Cricket was hampered by the want of a pavilion, and one of the remaining tennis courts has had to be sacrificed to the builder.

9. At Deccan College Professor Rawlinson acted for Mr. Bain as principal from January, Mr. Bain's class work being taken by Mr. A. C. Farran. Professor Ghate was succeeded in the Sanskrit chair by Dr. S. K. Belvalkar. The number on the roll fell slightly from 255 to 244. For the B. A. honours 26 were sent up, of whom 1 secured a first class and 3 a second; 8 passed only, and 14 failed, indicating that the entries had been somewhat reckless. For the pass examination 15 were sent up and 6 passed. An outbreak of plague in the servants' quarters was nipped in the bud by Sub-Assistant Surgeon Dandavatte, who inoculated 75 persons in a day and put them all under canvas. With the cordial assistance of the staff the library has been entirely rearranged; but Mr. Rawlinson complains that the work of the college is seriously handicapped by want of accommodation. During the supplementary term short courses of lectures were given on various general themes. The Marátha scholar of 1914 absented himself from the examination at the end of the year, and failed in March 1915; there are now ten Maráthas in the college, most of whom are aided by their Association. Of the Sanskrit manuscripts belonging to the college 75 were lent amongst 18 scholars in India; the sending of manuscripts out of India has been suspended on account of the war, but copies are supplied to those willing to pay for them. Professor Ghate expresses some uneasiness as to the fate of the manuscripts that are with scholars in Germany, and renews his complaint as to the tardy printing of the catalogue.

10. During the monsoon term Gujarát College was in charge of Mr. Rawlinson. The number on the roll declined from 494 to 414. That an easy matriculation standard is no real kindness to the weak candidates is indicated by the circumstance that out of 266 candidates only 144 satisfied the college test at the end of the year, 26 more securing the certificate at the supplementary examination in March. For the B. A. honours only 7 appeared, of whom 4 obtained a second class, 2 passed, and 1 failed. For the pass examination 33 appeared and 21 passed. The Rev. Mr. Robertson writes that thanks to the courage of the matriculation examiners of 1914 the quality of the first year class was far higher than that of corresponding classes for many years past. Mr. Commissariat took a party to visit the Shivaji country; Mr. Divatia took another to various chemical works at Baroda; and Mr. Saxton took a third to study the flora of Mount Abu. The number of residents was 187, and another hostel could easily be filled. The cricket and football fields have been levelled and fenced, and the general appearance of the grounds is being gradually improved. The equipment of the science laboratories is nearing its conclusion; Mr. Saxton has laid out his botanical garden in an admirable manner, and is justly proud of his herbarium. The number of science students however is still small.

11. Wilson College lost Professor Diack through drowning at Mahableshwar, and Monsieur Peltier, who was recalled to France on the outbreak of war; in the latter's place Mr. V. G. Rao gave his services gratuitously. The number on the roll declined from 896 to 770. For the B.A. honours 30 appeared, of whom 2 secured a first class, and 4 a second; 13 passed only, and 11 failed. For the pass examination 61 appeared and 39 passed. Dr. Mackichan comments on the importunities of the students who fail in the college examination at the end of the first year; on the varying difficulty of attaining high honours according to the branch offered; and on the inferiority of the new pass degree to the old third class.

12. At St. Xavier's the number declined from 644 to 525. As the war progressed orders were issued for the internment of certain members of the staff, whose places were to some extent filled by old members of the college, the expense being borne by Government. For the B.A. honours 17 were sent up, of whom 1 secured a first class, and 9 a second; 4 passed and 3 failed. For the pass examination 52 appeared and 38 passed. Two-thirds of the applicants for hostel accommodation had to be disappointed.

13. At Fergusson College the number declined from 1,165 to 1,046. In the preceding year 487 freshmen were admitted, and the number appearing for the college examination at the end of the year was 591, of whom only 210 passed. This college opens its doors wide and no doubt its finances profit thereby; but the figures just quoted may justify one in doubting if any real service is rendered to a large number of those admitted. For the B.A. honours 36 were sent up, of whom 3 secured a first class (all in mathematics) and 8 a second; 16 passed and 9 failed. A new hostel is in course of construction, half of which was ready by January. A member of the staff returned from Germany after taking a doctor's degree, and German will soon be introduced as a second language in the college.

14. The number attending the Dayaram Jethmal Sind College declined from 246 to 202, besides 34 in the engineering branch. Death deprived the college of its professor of mathematics, Rao Saheb B. J. Naik, who had served it since its opening in 1887. For the B.A. honours 5 were sent up, of whom 2 secured a second class, 2 passed, and 1 failed. For the pass examination 13 were sent up and 12 passed. A number of schemes for the extension or improvement of the college are in hand.

15. Proposals for an arts college at Dhárwár were submitted to Government in June 1914, but the small amount of local subscriptions paid in hitherto, and the difficulty of financing any large scheme during the continuance of the war have prevented any progress being made with it. Proposals for instituting an arts college for Mahomedans from Sir Mahomed Yusuf's donation of eight lákhs of rupees were also submitted in June; but Mahomedans seem to be divided amongst themselves as to the best use to be made of this donation. Proposals for an arts college for women were submitted to Government in March 1914. The society which conducts the Nutan Marathi Vidyalaya approached the Syndicate with proposals for the opening of a second-grade arts college in Poona City; but the scheme was found to require considerable modification and reconsideration. Proposals for the institution of a Sanskrit college at Poona, in pursuance of the Government of India's policy of encouraging the old forms of learning, were submitted in May 1914.

16. **Professional Colleges.**—The College of Engineering lost the valuable services of Professor N. B. Macmillan, who was compelled by ill-health to resign. The total number of students in the University classes decreased from 166 to 136, whilst the number of probationers increased from 13 to 61, these changes being due to the change in the academic year. Out of 190 candidates sent up for various University examinations in November 139 passed. The erection of the machinery in the mechanical engineering laboratory is nearing completion, and the three students admitted to this branch duly passed their first examination. New syllabuses were approved for the sub-overseers' and workshop branches, the number of students in which decreased from 119 to 84 on account of the change in the year. In the workshop three appeared in the mechanical branch, and seven in the electrical, and all passed. For the sub-overseers' examination 19 appeared, and 16 were successful. The College report is silent on the subject of the normal class. The fourth grade accountants' examination of the Public Works Department was held as usual, and 11 passed out of 39. The gymkhana year was one of persevering work and disinterested enthusiasm; and a number of interesting papers were read before the scientific society. A geological party was conducted to Gokak and Hubli; and engineering tours were undertaken to the Krishna bridge at Mahuli, the Nira Right Bank canal, Lake Fife, and the Tata hydro-electric power works.

The workshop students were taken to appropriate sights in Bombay. The Marátha scholar in the Second Engineering class failed in his examination; the scholar in the workshop was promoted and had his scholarship raised. Meetings of the college advisory committee were held in July 1914 and March 1915.

17. Professor Mirza Ali Akbar Khan succeeded Mr. B. N. Lang as principal of the Government Law School. The number of students decreased from 509 to 461, of whom 280 were in the first year and 181 in the second. The first year class was subdivided from June 1914, and an increase of pay was sanctioned for the staff for delivering three lectures a week instead of two. The number sent up for various examinations increased from 786 to 871, but the number passing declined from 354 to 338.

18. At the Sydenham College of Commerce and Economics the number of students increased from 92 to 143; 87 appeared for the intermediate examination in commerce and 53 passed. The curriculum was recast in the course of the year, and the quality of the students joining showed an improvement, perhaps because the educational status of the college is becoming better appreciated; a larger proportion of them were the sons of business men. The staff is being gradually strengthened by the addition of specialists in various branches, the methods of tuition have been reorganized by Mr. Anstey, the library is being built up, visits of observation were paid to factories and the like, and a series of addresses by distinguished outsiders was inaugurated. Mr. Anstey claims that a sound foundation has now been laid for the systematic and scholarly study of a number of subjects formerly lumped together under the title of Political Economy, and taught in a necessarily perfunctory way by a single professor. He looks forward to a further revision of the curriculum, a corresponding levelling up of the qualifications of the teaching staff, and the occasional engagement of lecturers from outside. Unfortunately the professor to be obtained from England has not yet been recruited; and the college cannot help being handicapped until it obtains its own building, hostel, and playground.

19. In partial connection with this College an Accountancy Diploma Board was constituted in February 1915, with the Director of Public Instruction as chairman and Mr. K. S. Aiyar as secretary, for organizing and conducting examinations for accountants throughout India and awarding a diploma in accountancy. Draft regulations were drawn up and forwarded to the Auditors' Council in Bombay for consideration.

II.—SECONDARY EDUCATION.

20. **Programme.**—The following is a brief account of the progress made with the suggestions for the improvement of secondary education outlined in 1911, and referred to in paragraphs 10 and 14 respectively, of the two preceding annual reports:—

(1) *New high schools at Jalgaon and Lárkána.*—The former started work in June 1914; plans and estimates for the latter were under preparation.

(2) *Buildings for the secondary training college.*—Rough plans and estimates were under preparation.

(3) *Improvement of the pay of assistant masters.*—A revision costing Rs. 26,220 per annum was sanctioned in July 1914, Rs. 22,000 of this amount being debited to the income derived from enhanced fees.

(4) *Additional headmaster in the Indian Educational Service.*—The fourth headmastership was permanently sanctioned in September 1914.

(5) *Construction or extension of buildings.*—Work on the new building for the Násik high school was suspended for some months pending the result of certain experiments with the foundations. The provision of a better building for the Thána school was under consideration, as also the extension of the Surat school. An offer of Rs. 36,000, coupled with certain conditions, for a new building for the Nadiád high school could not be accepted, as there is no prospect of Government being able to finance the rest of the scheme in the near future. Plans and estimates for extensions to the school at Godhra were in preparation. A site has been settled on for a new high school at Poona. Revised proposals for dealing with the Karwár high school were sanctioned, and a piece of land was acquired as a first step. Proposals for providing the Ratnágiri school with a new building were also approved.

(6) *Additional teachers.*—One additional class teacher and two gymnastic teachers were sanctioned.

(10) *Laboratories and scientific equipment.*—In the Government secondary schools Rs. 48,729 were spent on apparatus for teaching the new course; Rs. 19,609 on temporary arrangements for carrying on the work (including the provision of laboratory assistants); and Rs. 5,000 on the construction of permanent laboratories. Grants-in-aid were allotted for laboratories and equipment elsewhere.

(11) *Hostels.*—Rs. 13,837 were spent on small additions and improvements; the hostel at Sholápur was in progress, and those at Belgaum and Bijápur were completed.

(12) *Additional Educational Inspector.*—The proposal for the creation of a new post in the provincial service was approved, but could not be carried into effect on account of the financial situation.

(15) *Inspector of drawing.*—Mr. R. A. Hoggarth arrived from England in November 1914.

(16) *Development of secondary education in Sind.*—A scheme was generally approved in July 1914, and an instalment of the cost amounting to Rs. 20,000 was reserved, but no detailed proposals were received from the Commissioner.

(18) *Medical Inspection.*—The scheme was approved, but could not be carried into effect on account of the financial situation.

Items (9), (14) and (17) had been carried into effect already; and there is nothing new to be added under (7), (8) and (12).

21. **High schools for boys.**—In British districts these increased from 106 to 110, of which 21 were Government, 4 municipal, and 85 under private management. (The number shown under private management last year included 5 schools situated in Native States.) New schools were opened at Jalgaon and Ahmedabad; and schools at Dadar, Nargol, and Poona formerly classed as middle are now classed as high. On the other hand a school at Belgaum formerly classed as high is now classed as middle. The total number of pupils increased from 47,588 to 48,577. The Anglo-Vernacular schools were 94 in number with 33,825 pupils.

22. **Government high schools for boys.**—The number of schools increased from 20 to 21 through the opening of one at Jalgaon; the total attendance fell from 7,356 to 7,353, but these figures are affected by the circumstance that the matriculation and school final examinations were held in both November and March, so that many boys disappeared from their schools during

the interval. Apart from the addition of 304 boys at Jalgaon nine schools show small increases totalling 150, whilst eleven show decreases totalling 457. The large decreases are 41 at Sholápur and Dhárwár, 61 at Ahmedabad, 63 at Hyderabad, and 138 at Násik. These were due to plague at Sholápur, Hyderabad, and Násik; at Dhárwár the decrease is attributed to greater strictness in admission and promotion, and at Ahmedabad to the holding of the supplementary examinations in March. The additional fee income is now permanently taken as Rs. 50,000. This income has made it possible to improve the pay of the assistant masters by fixing Rs. 50 as the minimum and increasing the number of posts of Rs. 150, and also to revise the pay of the teachers of drawing, other improvements being hung up for the present on account of the war. The savings are being utilized for the introduction of practical work in science and manual training into the schools.

23. The Govardhandas Sunderdas high school at Jalgaon started in June 1914 with 250 boys; in January there was a rush for the first and fourth standards, 68 applications being refused, and by March 1915 there were 304 boys in ten classes. Only 6 per cent. of these were Mahomedans, though the Máhomedan population in East Khándesh is over 20 per cent. of the whole. The school was formally opened by Mr. Rothfeld, the Collector, in August.

24. Amongst the other important events of the year were the introduction of Mr. Wren's physical drill; the systematic recording of weights, measurements, and eyesight; the holding of training classes by the inspector of science teaching; the arrival of an inspector of drawing; the opening of a sloyd training class at Dhárwár; the deputation of Mr. V. N. Ghate in order to demonstrate the use of the magic lantern; the provision of science apparatus and accessories on a liberal scale; special grants for teachers' and boys' libraries, and for pictures, maps, and charts; and a certain amount of activity in connection with the war. Headmasters continued to be deputed for a short time to the secondary training college, and drawing teachers for a session to the school of art. Mr. Girdwood, of the firm of Underwood, prepared a series of 250 stereoscopic views for secondary schools, and two sets together with 18 stereoscopes were supplied to each school at a total cost of Rs. 12,816. The construction of the new high school building at Násik was resumed after a long interval due to trouble with the foundations. Besides the large works here and at Sholápur, Bijápur, and Belgaum (for hostels) about Rs. 40,000 were expended by the Public Works Department from various imperial grants; over Rs. 7,000 were assigned for minor works, and over Rs. 54,000 for furniture and equipment of various kinds.

25. Elphinstone high school was successively in charge of Mr. A. S. Dalvi, Mr. Wren, who was then seconded for military service, and Mr. Turner, who also left for military service at the end of the year. Mr. Miller spent the rains at Rájkot, his place at Belgaum being temporarily filled by Mr. Mangalvedhekar. Poona high school passed from Mr. Griffith (transferred to Rájkot) to Mr. Dalvi. Mr. N. D. Banhatti was appointed the first headmaster of the new school at Jalgaon. In consequence of retirements at the beginning of the year the Sholápur school came under Mr. P. R. Godbole (who however preferred to return to the Poona training college before long), and then Mr. R. L. Soman; whilst Mr. Pandya succeeded at Broach, Mr. F. D. Mehta at Surat, Mr. J. B. Mehta at Godhra, and Mr. Hungund at Bijápur. Mr. G. G. Nene was in charge at Ratnágiri for most of the year. In the course of the year Mr. W. Grieve arrived to take charge of the school at Karáchi, Mr. Lalvani reverting to Shikárpur; and at Násik Mr. R. K. Bhide succeeded Ráo Bahádur Deshmukh, whose thorough acquaintance with local conditions had enabled him to carry the school safely through somewhat troublous times. At the end of the year Mr. Dange, another officer of long and meritorious service and a strict disciplinarian, retired at Dhulia; and Mr. K. H. Dhruva, well known as a Sanskrit and Gujaráti scholar, at Ahmedabad.

26. These schools taken together sent up 1,033 candidates for the matriculation, of whom 337 passed (32 per cent. against a general percentage of 30). The Ahmedabad school secured the first place in the list; the Hyderabad school secured the first place in Sind; and the Ratnágiri school passed 19 out

of 21 candidates, and secured one of the Sanskrit scholarships. For the school final the schools sent up 572 candidates, of whom 277 passed (48 per cent. against a general percentage of 47). For the first grade drawing examination they sent up 424 candidates, of whom 259 passed (61 per cent. against a general percentage of 59); for the second grade 251, of whom 156 passed (62 per cent. against a general percentage of 61); and for the third grade 142, of whom 118 passed (83 per cent. against a general percentage of 69). The total number of free studentships awarded was 726, and 115 remained vacant for want of suitable applicants; I note that at Dhulia 12 out of 36 Mahomedans obtained exemption, but only 18 out of 115 backward Hindus. The total number of teachers in Government high schools increased from 385 to 421, and the number of graduates from 242 (63 per cent.) to 276 (65 per cent.); but the number of trained teachers fell from 208 (54 per cent.) to 190 (45 per cent.). This rather disappointing result was due to the circumstance that, although 28 trained teachers were added to Government secondary schools in the course of the year, 23 were transferred to the inspecting line or to other institutions, 14 were sent to the sloyd class, and 6 disappeared in other ways. The constant drain of men to the inspecting line was apparently a need not foreseen when the training college was planned.

27. Prize distributions were held at twelve of the schools, and we have to thank Their Excellencies and the Commissioners, Collectors, District Judges, and other gentlemen and ladies who were good enough to preside on these occasions. Plague came in the way of any such ceremony at Násik and Hyderabad; but no explanation comes from Jalgaon, Sholápur, Ahmedabad, Belgaum, Ratnágiri, Kárwár, or Karáchi. In one case it is recorded that out of 50 parents invited only 6 responded. Parents and other friends were in some cases invited to the lantern lectures which were freely given in most of the schools; Godhra seems to make a feature of inviting ladies on these occasions, and Kárwár gave four lectures specially for parents. Most of the headmasters refer appreciatively to the grants for pictures, and to the distribution of stereoscopes and photographs to be used with them; only from Belgaum was it reported that the use of these had not yet been organized. The school libraries visited by Mr. Fraser on the tour mentioned below were purged by him of useless or undesirable books. The boys' libraries are being freely used in most cases, but there is a lack of suitable vernacular books for the younger boys. At Poona caution money was no longer required, with the result that 1,539 books were issued against 865 in the preceding year; at Belgaum caution money is still exacted, and only 430 books were issued to a school of twice the size. Dhárwár issued 1,178 books and Jalgaon 632; at Sholápur advantage is taken of the conversation and composition lessons to see that the boys understand what they have been reading. From Broach and Nadiád it is reported that the boys cling to their text-books and are apathetic in the matter of extra reading. The Elphinstone, Dhulia, Ahmedabad, and Surat schools make no reference to the subject. A few schools have attempted a boys' reading room, but accommodation and funds are usually deficient.

28. Full advantage was taken for the first time of the grant of Rs. 500 sanctioned at the end of the preceding year for each high school as a contribution towards the cost of school excursions. The following were amongst the places visited, sometimes by more than one party:—Bombay, Elephanta, Bassein, Kanheri caves, Mátherán, Karla caves, Lohogad, the Tata hydro-electric works, Poona, Sinhgad, Pandharpur, Bijápur, Bádámi, Gadag, Vijayanagar, Dhárwár, Gokák, Bangalore, Mysore, Seringapatam, Kolar goldfields, Ellora caves, Ajanta caves, Baroda, Broach, Surat, Dumas, Navsári, Bulsár, Pavagad, the manganese mines of Shivrájpur, Ahmedabad, Rájkot, Junágad, Girnar, Verával, Somnath, Dwarka, Porbandar, Bhávnagar, Pálitána, Ajmer, Jaipur, Agra, Fatehpur Sikri, Muttra, Delhi, Karáchi, Tatta, the Indus, Jacobabad, and Khairpur Mirs. No excursion was attempted at Násik through the school being closed on account of plague; or at Belgaum, for no intelligible reason. The longer excursions are naturally limited to the senior boys, but in a few cases boys of all standards from the first to the seventh enjoyed an outing. Our cordial thanks are due to a large number of administrators,

dewáns, political and district officers, railway and steamer officials, headmasters, and heads and managers of a variety of institutions for their kindly co-operation, as well as to the teachers who actually accompanied the parties, and to whom of course an excursion is by no means a holiday. The outings seem on the whole to have been fairly well planned and organized, but some programmes were too ambitious, schools beginning with very distant excursions instead of gaining their experience from simpler trips close at hand. Tours of several weeks' duration are out of place in term time. A number of instructions for the guidance of headmasters have now been issued from this office; and practical information on the subject will gradually be accumulated in the pages of *Indian Education*. Besides the intellectual benefit to the boys, the excursions are bringing them and their teachers into closer contact; and it is noted that the Godhra teachers travelled in the third class along with their boys. The Ahmedabad party dressed in uniform style, and found that this not only helped to keep the party together, but also attracted friendly interest and offers of assistance. The high school hostels have been found to serve an unexpected purpose by supplying havens of rest for these wandering parties from other schools. In some cases the boys are made to write an account of their trip, and prizes are awarded for the best essays.

29. Games in most cases continue to flourish, though they are reported to have received a serious setback at Poona for want of any ground that the school can call its own. The use of stilts has been introduced at the Elphinstone school, and the game of rounders at Dhárwár. At Belgaum Mr. Aga is praised for his successful organisation of games for 500 boys; but the *rules* of English games are insufficiently known. In a few cases some form of physical exercise is compulsory upon every boy. Besides the regular drill Mr. Wren's system of exercises is carried out in many schools, though somewhat hampered by the want of the manual which he promised to produce on the subject. At Poona the exercises are taken in all the standards every day by the class masters, and it is said that "there cannot be two opinions about the advantages; besides improving physique it makes the boys smart, and shakes off the dullness into which they are liable to fall after strenuous work for two or three periods." The proper method is to perform the exercises twice a day for five minutes at a time under the supervision of the class master. This appears to be carried out also at Dhulia, Ahmedabad, Broach, Surat, Nadiád, Godhra, Karáchi and Shikárpur. At Sátára it is only performed in some of the classes; at Sholápur only once a week; at Kárwár for 15 minutes daily after the lessons; and at Thána and Belgaum the exercises are conducted once a week by the gymnastic teacher, which is not in the least what was intended. The Elphinstone, Jalgaon, Násik, Dhárwár, Bijápur, Ratnágiri, and Hyderabad reports do not refer to the subject. The scheme of medical inspection has been postponed till the financial position improves; but the boys are being regularly weighed and measured, and have their eyesight tested, and the results are recorded. The proportion of boys whose sight is not normal is considerable, and in several cases the boys have been provided with glasses or medical treatment in consequence.

30. Moral instruction is now given regularly in most of the schools. At Poona it is given once a week, in Maráthi in the lower standards and in English in the upper ones; Mr. Gould's plan is followed, the theme being illustrated from Mr. Enthoven's extracts. Much the same appears to be done at Jalgaon, Násik, Dhulia, Surat, Nadiád, Godhra, Ratnágiri, and Kárwár; and while it is recognized that it is yet too early to look for results, it is thought that the lessons, however far from the ideal, are still capable of doing some good. At Sátára, Sholápur, and Thána they are given only once a fortnight. The subject is ignored in the Elphinstone school report. Of Sind Mr. Hesketh writes that considerable attention is paid to moral lessons, but the teachers do not always realize that the object is to teach morality, and choose difficult lessons in English, with the result that the boys' whole attention is occupied in grasping the meaning; from which it appears that some method that was never intended is being pursued in Sind. At Dhárwár the headmaster confines his teaching to the giving of moral instruction to all the standards. At Ahmedabad "a feeling of respect for the good name of the school is instilled into the minds of the

young pupils, and high moral ideals are set before them by personal example." At Bijápur no regular instruction is given, "as it is thought that such lessons are not likely to produce any good impression on the mind of the boys." At Belgaum moral training was sought to be imparted through the scout system referred to in last year's report; this has been reported on in detail separately, and the question of its extension to other schools is before Government. It lays such a heavy burden upon the masters that their zeal is reported to have diminished of late; but the sterling work of Mr. Kelkar is specially acknowledged in this connection. At Broach nothing was attempted from a mistaken idea that moral instruction was to be given only in schools visited by Mr. Gould.

31. The subject of the war has naturally received some attention in these schools. Literature was distributed to them, including copies of the Gujaráti summaries issued by the Maharani of Bhávnagar; lectures were delivered, and conversational information given. Some schools provided themselves with maps of the eastern and western theatres and a supply of flag-pins; but the immobility of both sides in the west deprived these of most of their interest. At Ahmedabad half a dozen Pársi boys offered to join the Pársi volunteer corps; and although most of them belonged to the senior eleven, the honours of the cricket tournament were allowed to go, that they might achieve the higher honour of serving the country. It seems worth while to record the following contributions to the war funds:—Poona high school, Rs. 212; Jalgaon, proceeds of a dramatic performance; Broach, Rs. 181; Surat, Rs. 289, and also Rs. 50 towards a bed in the Indian ward; Godhra, Rs. 225; Thána, a contribution to the Indian ward; Bijápur, Rs. 30 and the proceeds of a dramatic performance; Kárwár, Rs. 50. At Karáchi a box put up in the school has realized about Rs. 70 monthly.

32. The newly built hostel at Sátára lay empty the whole year for want of water and sanitary arrangements; the Belgaum hostel (perhaps the finest we have yet built) was completed some months before the end of the year, but could not be occupied for want of lighting arrangements. The Dhulia hostel had 54 inmates at the end of the year; a small garden is being laid out by the boarders, and English and Maráthi debating clubs have been opened. The food charges were Rs. 9-7-6 a month for Hindus and Rs. 8-3-3 for Mahomedans; Mr. Fraser tried the Hindu food without notice and expressed his satisfaction with it. The Ahmedabad hostel had 42 inmates; the Broach hostel, with 25, suffered much from malaria; the Surat hostel, with 25, suffered from two high floods in the river; the Nadiád hostel had 56 inmates, and the cost of living rose from Rs. 8-8-0 to 9-8-0; and the Godhra hostel, which has been a success all along, had 51 boys in rooms intended for 44. At Dhárwár there were 105 boys; here also Mr. Fraser tried the boys' breakfast and found it appetising and nourishing. At Bijápur the second block was taken over and partly occupied, and the boarders now number 61, of whom 23 are Lingayáts; the introduction of a water-supply has lessened the inconveniences, but the rooms badly require sunshades on the east and windows on the west. The Ratnágiri hostel has at last obtained a water-supply, but had only 28 inmates; at Kárwár there were 17. At Hyderabad the hostel for 40 is generally full; whilst at Shikárpur there was a great rush this year, and though an extra building was rented for 15 boys, more than 120 applications were rejected.

33. An enquiry as to how some of these hostels could be made more attractive to boys revealed some difference of opinion as to the real reason why boys do not enter them. The reason usually assigned is that living in them is more expensive than living in the town. On the other hand one headmaster was of opinion that the present unwillingness of parents to send their sons to the hostel was mainly due to their ignorance of the advantages of this newfangled institution. Mr. Lory thinks that in the majority of cases it is the boy and not the parent who decides where he should live, and if the boys prefer to patronize private hotels, it is not so much because of their cheapness as because the boys have more license when living in the bazaar, and the life there appeals to them more. It is not the case that the cost of living in a hostel greatly exceeds that of living in the town; at Shikárpur it is even said to be much less. But a difference of even a few annas seems to be a consideration with some boys. It is a question whether it would not be well first to

keep the food charges down to the minimum, richer boys being allowed to supplement this by purchases from their own pockets; and then to insist on all boys without proper homes in the town living in the hostel to the limit of its accommodation. The poorest could continue to get help from charitable persons, or to be fed free by their richer companions, as is sometimes the case already.

34. Owing to the change in the academical year the secondary training college was closed during the term from January to March. The vice-principal was deputed to assist the inspector of science teaching, whilst Mr. Fraser was asked to make a round of the Government high schools and to advise with regard to their equipment and other matters which he has specially studied. In the time available 13 schools were visited. Mr. Fraser inspected the work of the trained teachers, criticized the furniture, purged the libraries, hung the pictures straight, sampled the boys' food, and offered a variety of suggestions to the staff on the spot. I subjoin a few extracts from his report:—

"No great influence of the secondary training college is at present visible in the high schools. The number of trained teachers in the schools is very small, for many have either left the department, or secured promotion outside schools, or joined the inspecting branch; and some of the best have been drafted into the sloyd class. Even of those that are now working in the schools some are imperfectly trained, and some are men of small capacity. There are as yet no trained headmasters, and only one or two who know anything about the college or its methods. The trained teachers do undoubtedly show improvement in classroom method, but outside the classroom much is still undone; *e. g.*, a special feature has been made at the college of the construction of relief maps, but not one was found constructed by any master at the schools. A special feature has been made of museums, but only two embryonic museums were found at the schools. Only in two instances had anything been done to repeat the plague lessons, and more than once I found plague raging in the town and trained teachers in the high school, who had been at the Laboratory, quite silent..... Without doubt one of the circumstances that most retard the progress of education is the isolation of all educational institutions. There is nowhere in any direction, high or low, any exchange of educational ideas or experience. It has occurred to me that something might be gained by the formation of educational or teachers' associations in all centres where there are Government high schools. Much cannot be hoped from any such move; the experience of the Bombay Teachers' Association forbids that. Still it seems one possible expedient for stirring up the lethargy of our educational world..... The teaching of Sanskrit through English appears to begin far too early; this subject might be taught in the vernacular up to the highest standard, and then for the first time English and Sanskrit be brought together..... The experience of ten years has taught me many small improvements in the construction of dual desks tending to durability and comfort, and those who wish to have the advantage of this experience should apply to Messrs. Hari Ramchandra of Mugbhat (Bombay), who make them under my own directions..... Few school buildings, even the most modern, show any attempt to grapple methodically with the complex problem of lighting and ventilation. The latter is often good except that the important feature of roof ventilation is neglected. The lighting is generally bad. It is almost always cross lighting; and the boys are often put to face the open window or door, so that their eyes are tried by the strong glare without while they seek to accommodate themselves to the subdued light of the room. In one school, quite a modern building, in a place where the problem of lighting is chiefly to keep out the superabundant glare, the architect has met it by (1) making three times as many openings as are necessary, (2) covering them all up with heavy verandahs, and (3) rectifying this by introducing the least desirable form of lighting in India, *viz.*, sky-light. I advocate an experiment in the direction of a building running east and west, lighted by a clerestory on the north. Such a building should have no verandah on the north and a deep verandah on the south. A room on such principles may be seen in the old drawing hall of the training college at Dhulia; but much better examples can be found in the training college for men at Dhárwár. These rooms deserve careful study by any school architect..... The orientation of hostels should not be neglected. If possible, they should be lighted from the north. If this is not possible, then there should be a verandah on the east side, so as to exclude the morning sun, because boys are always in their rooms in the morning. Almost all hostels are built in small rooms where three boys live and sleep. This plan is open to objections, and the proper plan is that of the English school, where all boys sleep in a large dormitory, the 'studies' being only used in the daytime..... In earlier days there may have been a case for making a teachers' library one in which no good book was positively out of place. It seems to me however that the general growth of local libraries makes this principle obsolete, and leaves room for the application of another, *viz.*, that teachers' libraries are meant to provide books which will directly help the teachers to understand the subjects they teach, and to illustrate these subjects by suitable pictures. This principle seems often to be entirely overlooked, and many books are still bought which have no place in school libraries. What are required are good modern works of reference, and above all illustrated books..... It seems as yet to be little realized that school equipment is meant to be used. School libraries are full of unsuitable books, their cupboards are full of

obsolete or superfluous apparatus; and even useful books and apparatus are often left to their repose for months together. The choicest picture in the school may possibly be found in the headmaster's office behind a door."

35. **Municipal high schools for boys.**—These remained four in number, but the pupils decreased from 1,067 to 1,064. The Pandharpur school had 193 pupils, and more accommodation is wanted; a good playground has been secured. The Edward Memorial school at Kaira, with 141 pupils, is still inadequately housed and equipped, and does not offer salaries sufficient to induce graduates to stay. The Lamington high school at Hubli, with 389 pupils, has only one certificated teacher, no science apparatus, and no science graduate. The Sukkur school had 341 pupils and contrived to show good results, though it is difficult for a municipality to retain an efficient staff as the scope for promotion is very narrow.

36. **Aided Anglo-Vernacular high schools for boys.**—The schools increased in number from 52 to 54 (owing to the elevation of two middle schools), and the pupils from 16,980 to 17,091. The Deccan Education Society's schools at Poona and Sátára showed careful and intelligent work, and the Dravid high school at Wái also earned a fairly good report. Though the teachers of the Nutan Maráthi Vidyálaya at Poona are not well paid, the work done was good. The Poona Native Institution has a bad building, is not very zealous about improved methods, and failed to earn its full grant. The aided schools in Bombay are generally handicapped by want of suitable accommodation and by the apathy of the teachers, most of whom have no intention of sticking to this profession. The Anjuman-i-Islam high school did no better than last year, and the inspector is of opinion that the committee might with advantage leave the internal management to a competent and independent headmaster, as a school cannot be worked on the same lines as a co-operative shop. The other schools in the central division earned fairly good reports with the exception of the Bahadurji school at Lonavla and St. John's high school at Poona.

37. In the northern division the Avabai school at Bulsár seems to be the most efficient, though the Sarvajanik school at Surat also made progress and now has its own building for the high school classes; the Mission school at Surat was well conducted, and the Jubilee Institute of Umreth showed fair work on the whole. The only other school in this division at all well spoken of was the Union high school of Surat. In the southern division it appears that the range and quality of work done is in several cases below the standard. A hostel with room for 90 boarders has been opened at the Gibb high school, Kumta. In Sind the Shikárpur Academy took possession of its fine new building. The schools are gradually equipping themselves with dual desks, and some are collecting good libraries; the number of graduates on the staff is increasing. As many as nine secured a secondary teacher's certificate. A prevailing fault of the teachers is the tendency to do too much of the work, and to waste time, *e.g.*, by working out every example on the board even though every boy has solved it correctly. The Sind Madressah and the C. M. S. high school, Karáchi, continue to make good progress; but the two aided schools in Hyderabad appear to lack more skilled supervision.

38. **Unaided Anglo-Vernacular high schools for boys.**—In British districts the number of schools increased from 13 to 15, owing to the opening of a new school at Ahmedabad, and the elevation of a middle school at Dádar; the number of pupils increased from 7,871 to 8,317. Eleven of the schools are in Bombay. Of these the New high school is well managed, but the classes are too large; and the J. N. Petit Pársi Orphanage earned a good report. The Aryan Education Society's school wants proper organisation and more funds, and the Gokaldas Tejpal school needs more adequate supervision. The New Night high school has been very unfavourably reported on; as it meets only for two hours in the evening it should be content to teach only half of the usual course in a year. The Parsi school at Panchgani obtained a very good report. Ahmedabad had three schools of this class, of which the Proprietary high school with 1,375 pupils is the largest in Gujarát and one of the best conducted; the Native Institution lost 101 pupils chiefly through the improprieties committed by the new Tutorial high school.

39. **Middle schools for boys.**—In British districts (including Aden) these increased from 252 to 258, of which 6 were Government, 4 local board, 56 municipal, and 192 under private management. A local board school at Bankikodla in Kánara disappeared, while a municipal school was added at Shirpur in West Khándesh; the private schools increased by six. The number of pupils increased from 20,614 to 20,731.

40. Attendance at the four Government schools in this presidency increased from 1,275 to 1,304; the number of free studentships awarded was 97, and 47 remained vacant for want of suitable applicants. Mr. C. V. Patel succeeded Mr. Banhatti as headmaster of the Elphinstone school; Mr. Sutaria succeeded Mr. K. L. Desai at Surat; and Mr. Agarvala succeeded Mr. Patel at Ahmedabad. The trained staff has been considerably strengthened at the Elphinstone school, and some parents insisted on their sons being transferred to the direct method classes. The stereoscopic pictures have been much appreciated, and one boy brought some pictures of his own for the use of the class. Weighing and measuring are carried out, Mr. Wren's physical exercises have been introduced, and moral instruction is given. Boys' libraries have been started in the Elphinstone and Surat schools; Poona has a school co-operative society for supplying books. The Elphinstone school subscribed Rs. 227 to the war fund, Surat Rs. 127, and Ahmedabad Rs. 197. A prize distribution was held at Ahmedabad for the first time within the memory of man. The Elphinstone school is deafened, and will soon be overshadowed, by the new buildings for the Small Causes Court, and no progress has been made with the settlement of its own future.

41. The municipal schools in Bombay made fair progress, but not one of the teachers is a graduate; of the mofussil schools in the central division that at Yeola is best spoken of. The Bhusával headmaster obtained a secondary teacher's certificate. Of the aided schools in this division the American Mission school at Vadale was found most satisfactory. In the northern division some of the larger municipal schools, such as those at Ankleshwar, Dhandhuka, and Viramgám, exhibit a tendency to become high schools at no distant date; at 13 of the private schools the attendance was below 30, and such schools have little claim to exist. Equipment and accommodation are generally inadequate, and the staffs are professionally unqualified. In Sind the Tharushah and Mithí Local Board schools are making good progress, and municipalities are beginning to make increments of pay depend on the master's passing the secondary teacher's certificate examination; the aided schools with five or six standards are finding it difficult to make proper provision for science.

42. **Secondary education in general.**—The subjects and methods of science teaching have at last been taken in hand seriously, and the necessary text-books and laboratory notebooks are issuing from the press in various languages. Schools have been recommended in physics and chemistry to insist upon a small amount of elementary practical work, superlative in neatness and accuracy; in hygiene to teach the rules together with the reasons for their adoption; and to make the study of physiology entirely subservient to that of hygiene. The proper teaching of first aid is being organized (at least in the Government schools) in consultation with the St. John Ambulance Association; but the withdrawal of so many doctors for the war has put additional difficulties in the way. It is not known what the other schools recognized by the University are doing in this respect, nor what the schools in small Native States are doing in the matter of science at all; but perhaps the University will send some of its visiting committees to see. English is being adopted as the medium of instruction for standards VI and VII, and for the physics of standard V; the vernacular for standards I—IV; while the hygiene of standard V may be expounded in the vernacular if so desired, but the work done by the boys is to be recorded in English. The following are a few extracts from Mr. Pratt's first annual report:—

"Prior to the introduction of the present scheme there were practically no Indian high school laboratories in this presidency in which a class could work. At the present time there are 98 high schools which either possess a complete laboratory or in which a suitable one is

being provided. Designs have been supplied to all schools which have asked for them. Unfortunately some schools acted hurriedly, and wasted money in buying useless furniture. The furniture made for the Government schools by Hari Ramchandra is satisfactory in every way. The physics apparatus was practically completed last February: the chemistry apparatus has not all arrived..... I have held four training classes; the total number of masters attending them was 117. The Bombay class was attended by 13 teachers from Government high schools and 50 from others. The objects were (*a*) to make clear to those who attended the type of teaching desired by the department, (*b*) to instruct teachers in the method of taking a class of boys in the laboratory. The work referred to is of a nature quite distinct from all other work in schools. A master who undertakes it must not only be thoroughly familiar with his subject, but must also be a good disciplinarian and a competent organizer. I made a close study of the capacities of the masters who attended the class, and was pleased to find that the majority of them were enthusiastic and hardworking, and only too ready to profit by instruction and help. But I am more and more convinced that for many years only the most elementary work must be demanded. Most of the science masters could not carry out the simplest experiment with any degree of accuracy. At first the work of practically all the class was untidy, inaccurate, and foolishly unpractical. At Karáchi the number of teachers present was 11; the average standard of work was much higher in quality than in Bombay. At Ahmedabad the number of teachers present was 28. At Belgaum the number was 15; the class was not such a success, as the accommodation was not of the best, and the necessary apparatus had not arrived..... Complete schemes of work with fairly full details as to apparatus, etc., have been prepared and circulated to all schools for standards 7, 6 and 5. In all I have visited 71 schools, and so far as possible drew up plans on the spot. No genuine *inspection* visits can be made till after June 1916, the date by which all schools are supposed to have their arrangements in order. After this date every school should be thoroughly inspected at least once a year. This however will be a task entirely beyond the powers of one man, even if he had nothing else to do. If science is to be taught successfully a specialist should be appointed to the training college in Bombay, and masters intended for science teaching should receive special training there."

43. **High schools for girls.**—In British districts the number of schools increased from 30 to 31, of which 2 were Government and 29 under private management; the new school was one under the American Mission at Ahmednagar. The number of pupils increased from 3,969 to 4,346. The Anglo-Vernacular schools were 15 in number, with 2,055 pupils.

44. The high school for Indian girls at Poona shares a set of buildings with the training college and its practising school, with the result that both are cramped for accommodation; the number of girls on the roll increased from 266 to 320. Miss Newland has introduced gardening, in which a number of girls appear to take an interest. In the Government school at Ahmedabad the number rose from 130 to 173, of whom 8 were Mahomedans; the school secured a fair report on the whole.

45. The Sardar Dastur Nosherwan school at Poona teaches needlework, embroidery, music, and cookery in addition to the full boys' course, thus throwing a heavy strain upon the pupils. The American Mission school at Ahmednagar also teaches needlework and domestic science. The Motlabai Wadia Young Ladies' English school at Broach finds it almost impossible to secure a competent principal; one who came from Madras found the situation too lonely and resigned within 24 hours. The I. P. Mission Zenana school at Surat also suffers from the want of competent teachers. The other schools of this class are in Bombay, and those which cater for the Pársis have been hit rather hard by the war; many Pársi clerks have been thrown out of employment, or are working on reduced salaries, and schools have to accept children on reduced fees if they are to keep them at all. The plain needlework done in the Empress high school is excellent, and the teachers and pupils have devoted many leisure hours to making garments for the Red Cross Society, which compare favourably with those sent in by the European schools. The U. F. C. Mission school at Gowalia Tank Road maintains its high standard.

46. **Middle schools for girls.**—In British districts the number of schools fell from 52 to 50, all under private management; the number of pupils increased from 3,797 to 3,931. The number of Anglo-Vernacular schools was 20 with 1,104 pupils.

47. The head mistress of the Students' Literary and Scientific Society's school in Bombay, and the little band of honorary workers who are chiefly responsible for the studies in the higher classes, are warmly commended for

their unselfish devotion to the work. The Epiphany school of the Panch Howds Mission was the best of the Poona schools. There are four unrecognized schools of this grade in the northern division, besides a municipal class at Bándra with 11 pupils; and 23 girls are attending boys' schools in this division. In the southern division 42 girls were receiving secondary education in one way or another; the headmaster of the A. S. Desai high school at Málvan is reported to have opened a class for girls which is attended by twenty. In Sind there are five schools of this grade. The Kondanmal school at Hyderabad owes much to the untiring efforts of Mr. Javhermal, the first assistant, but lacks a competent headmistress; the inspectress was astonished to find both girls and teachers quite uninterested in the war. The Nava Kanya Vidyálaya school, also at Hyderabad, suffers from the continual changes in the staff, and the substitution of men for women. The third is a Párs school at Karáchi, and the other two belong to the Church of England Zenana Mission, of which the one at Karáchi is attended largely by the daughters or relatives of gentlemen of position, both Hindu and Mahomedan.

48. **Girls' secondary education in general.**—The high schools in or near Bombay were given an opportunity of deputing one or two teachers apiece to attend a series of lectures given by Miss Denison, a certificated athletic mistress; 43 teachers, representing 31 schools, joined, and 41 completed the course, at the end of which a practical examination was held and 29 certificates were awarded. This useful course has given a great impetus to physical training, and Swedish drill is replacing the aimless fancy drills which previously figured on the time tables. The Swedish exercises have been slightly modified to meet the wants of Indian schools, and are very popular with the Hindu parents who have been invited to witness them. A competition in Swedish drill was a feature of the usual inter-school competitions held by the girls' athletic association of Bombay, and the prize was won by a team from the U. F. C. Mission school, who were justly proud of carrying off a trophy competed for by European, English-teaching, and Anglo-Vernacular schools on equal terms; such an exhibition of skill by Indian girls came as a surprise to many of the spectators. The association owes much to Mrs. R. M. Gray, its honorary secretary, for her untiring interest.

49. **Schools for Europeans and Anglo-Indians.**—The number of European schools increased from 44 to 45, through the separation of the Convent school at Parel into European and English-teaching branches. The number of pupils increased from 4,049 to 4,244, of whom 3,752 were Europeans and Anglo-Indians. If to this number are added the 1,094 Europeans and Anglo-Indians attending the English-teaching schools, the total comes to 4,846 as against 4,633 last year. Of the 45 schools 10 are managed by Roman Catholics, and the rest (including the 12 Railway schools) by Protestant bodies. The total expenditure amounted to Rs. 6,06,557, towards which 37 per cent. were contributed from provincial revenues and 35 per cent. from subscriptions, endowments, and other sources. The fees averaged about Rs. 3-8-0 per mensem. The total number of teachers was 372, of whom 49 possessed a University degree and 210 were trained. The matriculation was passed by 17 out of 43 candidates; the European High School examination by 30 out of 38; and the four Cambridge Local examinations by 176 out of 347. Out of 45 schools 22 have hostels attached to them, of which 18 are permanent; all the important schools have made their own arrangements for the medical inspection of the children. The three training classes for mistresses continued, and contained 50 students, of whom 14 received stipends of Rs. 40 a month. Building grants amounting to over Rs. 1,34,000 were paid during the year, besides more than Rs. 39,000 for furniture and apparatus. Mr. Dudley writes that while there are no new departures to report at present (partly on account of the war), yet progress is being maintained all round. The Byculla schools celebrated their centenary, and the Bishop's high school of Poona and the Bándra Convent the completion of 50 years of work. A number of modifications in the European Schools' Code, based on the findings of the Simla Conference of 1912, were worked out and submitted to Government.

50. The number of English-teaching schools remained 40; the number of pupils declined slightly from 8,284 to 8,263. The grants-in-aid were increased by Rs. 28,500, and building grants amounting to over Rs. 52,000 were paid to schools of this class. There were 423 teachers in these schools, of whom 51 possessed a University degree and 147 were trained. These schools passed 68 candidates out of 96 at the matriculation, and 27 out of 35 at the school final. Their curriculum is out of date and was under revision during the year.

51. Of the girls' schools of this class Miss Corkery says :—

"These schools together with the Anglo-Vernacular schools were afforded the opportunity of attending a short course of lectures on the teaching of geography by Mr. Wren. The lectures were followed with much interest by all present, and the interest thus created had a marked effect on the quality of the year's work in this subject. Queen Mary's high school, Girgaum, maintains its high standard. St. Joseph's Convent English-teaching school at Bándra suffers from a lack of trained teachers in history and geography, but their domestic training is planned on well-organized lines. The Cathedral girls' school and the Clare Road Convent both suffer from inadequate accommodation. The managers of the Thána girls' school unfortunately do not realize the importance of keeping abreast with the times by employing well-paid trained teachers. The war has given a great impetus to the study of history and geography, and many teachers have made profitable use of the illustrations available."

III.—PRIMARY EDUCATION.

52. **Programme.**—The following is a brief account of the progress made with the suggestions for the improvement of primary education outlined in 1911 and referred to in paragraphs 54 and 65 respectively, of the two preceding reports.

(1) *Giving trained teachers their full code pay.*—During the year Rs. 88,932 were distributed for this purpose, bringing the total amount given for the improvement of pay up to Rs. 7,22,632, in addition to Rs. 15,880 formerly allotted separately for school-mistresses.

(2) *Extra accommodation for existing schools.*—To the sums mentioned last year Rs. 3,35,714 were added for free building and equipment grants to district local boards, and Rs. 1,83,626 for municipalities, bringing the total amount allotted for these purposes up to Rs. 13,60,100. The amount actually expended so far has been Rs. 94,123 by district local boards, and Rs. 10,000 by municipalities. In addition Rs. 37,700 have been transferred to the Public Works Department for the Humby vernacular schools at Manora.

(3) *Extra equipment.*—This is included under the preceding.

(4) *Extra assistants for undermanned schools.*—Rs. 55,068 were allotted for this purpose, bringing the total grant up to Rs. 1,56,068, in addition to Rs. 4,800 formerly assigned to girls' schools.

(5) *New schools.*—A lakh of rupees had been provided for this purpose in the budget, but on account of the outbreak of war it could not be repeated in the following budget, and so no new schools were opened.

(6) *Scholarships in Urdu central schools.*—The proposals were approved by the Mahomedan Education Committee, whose report is before Government.

(7) *Scholarships for boys proceeding from rural to full primary schools.*—In the northern division 228 scholarships have been sanctioned.

(8) *Recouping the minus balances of certain district local boards.*—Rs. 6,000 were paid to West Khándesh.

(9) *Grants to certain boards to balance their accounts.*—An additional recurring grant of Rs. 5,000 was sanctioned for West Khándesh.

53. **Primary schools for boys.**—In the British districts the number of schools decreased from 9,972 to 9,929, owing to a falling off of 74 schools in the central division. The number of pupils increased from 586,390 to 594,728. Details of increase or decrease are given below under the different managements, from which it will be seen that the falling off was under the head of "unaided schools," a fluctuating class about which accurate information is not always forthcoming.

54. The Government schools increased from 13 to 16, and the pupils in them from 1,620 to 1,933. The increase was due to the opening of factory schools at Gadag and Sholápur, and to the taking over by this department of a school intended for the children of those employed at the Yeravda Jail, Yeravda Reformatory, and Central Lunatic Asylum. The Poona factory school mentioned in the last report improved in attendance and efficiency. The Sholápur school, with 60 on the roll, had an average attendance of only 6; the co-operation of the managers is merely nominal. The Gadag school had 75 pupils. The general question of the measures to be taken to improve attendance at factory schools was under consideration during the year.

55. **Local Board schools for boys.**—These increased from 7,072 to 7,094, and the pupils from 382,481 to 392,579. There was an increase of 5 schools in the northern division, 5 in the southern, and 30 in Sind; and a decrease of 18 in the central division (15 in the Ahmednagar district) due to want of attendance. The number of pupils however increased in all cases. In the northern division 44 per cent. are held in buildings of their own, in Sind 43, in the southern division 36, and in the central only 25; in the last low-caste pupils are not allowed to enter in about 627 cases. The number of schools in the presidency proper in which the rural standards were being taught was 4,751; the number of pupils in these schools was 178,099. The percentage of cesspayers' children was 71 in the southern division, 66 in the central, and 61 in the northern. The percentage of children paying no fees was 38 in the northern division (or 45 if girls are included); the other

inspectors though asked for this information have not supplied it. Grants aggregating Rs. 3,000 were allotted to the district local boards of Surat, Ahmedabad, and Thána to enable them to raise the limit of exemptions from fees from 15 to 25 per cent. of those liable to pay them. The limit permitted in Kaira is already 20 per cent., which is not actually reached, and in Panch Mahals 30; elsewhere it is reported that the maximum is seldom reached and does not require to be raised.

56. In the Chopda táluka of East Khándesh an association has been formed and registered with the object of collecting funds and building school houses; a special officer of the Public Works Department has been retained, and one school has already been built. In the central division the inspecting officers have endeavoured to explain to the people how the rural standards (which were at first unpopular) were meant to prove more useful to agriculturists; and the chief complaint now is that the course prescribed for the infant class is too much to be completed in one year. Mr. Khare however is of opinion that this is mainly due to slackness on the part of the teachers.

"In the old Baibodh standards the amount of work demanded was brought down with the object of its being done on more intelligent lines. The number of trained hands available not being enough, the intelligent nature of the teaching dropped out automatically, and the teachers in the village schools became accustomed to do less work, and brought themselves to believe that more was impracticable. This is however a mistake. The work of the primary infant standard as regards the three R's can very well be finished in three months, and therefore the work in the rural standard should not be found difficult of completion in one year. As regards the rural standards being unpopular with the villagers my tour has confirmed me in my belief that a very large majority of the villagers hardly understand the difference between rural and primary standards. The village teacher himself does not study carefully the printed standards given to him, and cannot of course explain them to the people. The inspecting officer must make a point of showing to the people how in the course of four years the rural standards will give their children as much literacy as is practically required by them."

57. Of the northern division Rão Bahádur Shastri remarks that a staff of two conscientious teachers in a school of 50 pupils fairly distributed in all the four classes of a rural school does not find it difficult to work up the classes satisfactorily in the full course at the end of the year. This is the only division which has asked for scholarships to enable rural pupils to continue their studies at full primary schools; 228 have been sanctioned, of which 175 are reserved for higher vernacular study, and the rest for studying in standard IV with a view to proceeding to a secondary school. In the southern division three special engineers were appointed for the construction of school buildings, and it was hoped that 31 would be erected during the year, but only one reached completion.

58. In Sind the Upper Sind Frontier district showed an increase of nearly 15 per cent. in the number of pupils as compared with 1913-14, and of 50 per cent. as compared with 1912-13. This remarkable increase appears to justify the appointment of a separate deputy for that district. During the year 18 new buildings were erected, and great care is now taken in the choice of sites. The equipment also has been standardized. The question of providing quarters for masters was considered; and it was found that, while there was no very serious demand for them, the cost would be prohibitive. A "Lar" allowance has been sanctioned for the Karáchi district, and it is hoped that local men will gradually be found to take up the teaching profession.

59. Among the grants distributed for the improvement of schools were the following. In the northern division Rs. 10,000 for gymnasia. In the central Rs. 3,150 for school gardens; Rs. 120 for raising stipends in a boarding house for Kolis in the Násik district; Rs. 1,340 for starting similar boarding houses for backward classes in the Poona and West Khándesh districts; Rs. 7,600 for the maintenance of the new buildings to be erected out of the imperial grant, at 2½ per cent. on the capital expenditure. In Sind Rs. 3,312 for additional scholarships for Mahomedans in primary schools; Rs. 973 for experiments in the training of mullas by the mulla deputy; Rs. 1,000 for special allowances to masters serving in the Lar portion of the Karáchi district;

Rs. 3,357 for repairs; Rs. 1,500 for prizes; and Rs. 1,357 for pay of additional masters in the Sukkur district. The inspectors unfortunately say little or nothing as to what has been done with these grants.

60. **Municipal schools for boys.**—These decreased from 771 to 770, but the pupils increased from 108,281 to 108,695. In Bombay city the number of pupils decreased by 855 on account, it is said, of the war, some families who ceased to earn enough having left the city. The three schools intended for mill hands are not doing well, as those for whom they are meant do not seem eager to make use of them; hence the Schools Committee has been obliged to admit to them children not coming from mills, and probably they will turn into ordinary schools before long. The Marathi schools are doing well, but progress in the Gujarati and Urdu schools continues to be hampered by the want of good teachers. The municipalities of Sholápur and Pandharpur are specially mentioned for their willing co-operation with the department. The factory school at Amalner was closed for want of suitable accommodation. In the central division 35 per cent. of the schools occupy municipal buildings; no new municipal building was completed during the year.

61. In the northern division the Surat municipal schools are specially mentioned for their efficiency. For 41 schools Ahmedabad has only five buildings of its own, three of which it took over from the district local board; its No. 1 school, established 88 years ago, still lacks a house of its own. The members of the municipal schools committee could not find time to visit any of their schools, or even be present at the annual inspection. Their supervisor too failed to exercise any healthy influence over his colleagues. The bane of these schools is said to be the system of private tuition to which the teachers subordinate their legitimate duties. The Mehmadabad and Umreth municipalities are not only unable to provide for the ordinary expansion of primary education, but attempt to curtail their present expenditure on schools in order to meet increased expenditure on other objects.

62. From the southern division it is reported that municipalities are perfectly willing to foster education if only they had sufficient money to put up suitable buildings; but under present conditions it is useless to urge them to provide adequate accommodation. In Sind the majority of the municipalities continue to send their own masters for training, and 61 per cent. of the staff are trained; a number have also sanctioned schemes for bringing the pay of all their masters up to the code limit.

63. **Aided schools for boys.**—In British districts these increased from 1,946 to 1,989, and the pupils from 83,112 to 87,810. There was an increase of 39 schools in the central division, of 9 in the northern, and of 9 in the southern; but a falling off of 12 in Sind and of 2 in Aden. In the central division of the 547 day schools 317 are in local board areas, and 230 in municipal areas; of the 33 night schools 7 are in the former, and 26 in the latter. In Bombay city the number of pupils went down owing to the dislocation of business caused by the war. Of the Mission schools in the districts it is remarked that, although the quality of the teaching is not above the average, they set an example for others in the matter of order, neatness, systematic working, and the attention paid to cleanliness. The district local board of Poona continues to make provision for aiding small indigenous schools as they rise, until they are able to be taken on the regular aided list. This prevents private enterprise being nipped in the bud merely for want of a little support in the beginning. Grants amounting to Rs. 220 were awarded to 12 such schools attended by 300 pupils in all; and the experiment deserves to be continued on a larger scale, and to be tried in other districts also. From the funds specially allotted for the purpose books and slates were given to poor and deserving pupils in aided indigenous schools.

64. In the northern division the majority of indigenous schools are maintained by the Salvation Army and other missionary bodies. In the Thána district there are 19 schools for teaching English to Indian Christians, which are well reported on upon the whole; 13 of these are situated in the local board

area, and 6 in municipal areas, and they are aided both from provincial and from local funds. Of 547 aided schools in the southern division 482 are in local board areas and 65 in municipal areas. In Sind, besides the mulla schools, the only indigenous schools of any importance are the *ojha* schools of Shikárpur which teach Hindu Sindhi; these are aided under the mulla code in respect of the small proportion of pupils who learn a little Arabic Sindhi.

65. **Unaided schools for boys.**—These decreased from 170 to 60, and the number of pupils from 7,896 to 3,711. It may be supposed that 43 were transferred to the aided list (paragraph 63); but none of the inspectors offer any explanation of the rest of the decrease, nor any remarks on these schools.

66. **Night schools.**—In British districts these increased from 123 to 127, but the number of pupils decreased from 3,763 to 3,742. The Bombay schools were found to be doing well on the whole. In the Poona district the experiment of holding the schools thrice a week was not found to be popular, and was discontinued. A new Urdu night school at Satana (*Násik*) had 67 pupils; it met in a good building, and was managed by a blind Mahomedan whose religious learning gives him great influence over his community. The Ahmedabad schools are said to work on wrong lines, and to do little good to their students. The Surat schools are on the whole reported on favourably.

67. **Private schools.**—The number of such schools in British districts was 1,928, and that of pupils 39,107. The number classed as advanced was 134 with 3,457 pupils; the number classed as elementary was 1,709 with 32,981 pupils; and the number not conforming to departmental standards was 85 with 2,689 pupils. Many of these schools are of an ephemeral character, and accurate information is not always available. Those classed as advanced usually teach Sanskrit, or else Arabic or Persian; many of the others are simply Koran schools. In the northern division it is frequently found that the mosque schools succeed in diverting Mahomedan children from primary education.

68. **Primary schools for girls.**—In British districts these increased from 998 to 1,057, and the pupils from 73,339 to 77,253. There are also many girls in boys' schools, so that the total number of girls under instruction in primary schools was 111,999. The number of girls' schools increased by 44 in the central division, by 6 in the southern, by 7 in Sind, and by 2 in Aden. Government schools remained 7 in number; local board schools increased by 24; municipal by 16; aided by 24; while unaided decreased by 5. The number of pupils in Government schools decreased from 848 to 818; the number in local board schools increased from 21,752 to 23,811; and in municipal schools from 28,780 to 30,178. The Bombay municipality opened two new Gujaráti schools and two Urdu; needlework was generally well attended to. In the Poona district 10 girls were successful in the vernacular final examination, and two in the Násik district, where the municipal school at Yeola takes the lead. Through the institution of scholarships the attendance of girls in the higher classes has improved considerably. In the northern division most of the municipal schools are held in unsatisfactory buildings, and mistresses are as a rule most unwilling to be transferred to municipal service. In the village schools visited by her Miss Corkery marked a want of co-operation and sympathy between the parents and teachers; the headmistresses hold themselves aloof from social intercourse with their neighbours, probably on account of social customs which discourage women from spending their leisure hours away from their own homes.

69. In Sind Miss Brooke laments the untimely death of the Tharushah headmistress, who had shown herself capable, hardworking, and very sympathetic. The Berani school has been built and equipped by the local zemindár, who has always been its benefactor. Mr. Dharsimal, who recently retired from the Mithi school, received from the Commissioner a *lungi* and *afrinamah* in recognition of his work for girls' education in Thar and Párkar; the Islamkot mistress was suitably rewarded at the same darbár. The Karáchi municipality are said to tempt the better teachers away from other schools by giving them local allowances up to Rs. 10 in addition to the face value of their

certificates. The Tatta municipal school, well managed and well taught, is a pleasure to inspect. The Hyderabad municipal schools suffered severely from plague, in one case the headmistress dying and 12 children out of 26. Mr. Khiaram has shown himself an indefatigable and resourceful superintendent of the Rohri schools. The Shikárpur municipal schools are the most inadequately and inefficiently staffed in the whole province. Amongst the aided schools those of the Church of England Zenana Mission at Karáchi maintain their usual high standard of efficiency. At Hyderabad Mr. Khanchand, the Hindu Reform Association's manager, holds classes for his teacher two or three times a week; the Nava Vidyalaya staff changes continually. The Desh Hitkarni Devi Shala at Shikárpur is a centre of widening interest, and the sewing done by the girls is perhaps the best to be seen in any girls' school in Sind.

70. Amongst the grants distributed to girls' schools were the following. In the central division Rs. 2,000 for scholarships, Rs. 3,000 for improving local board schools; Rs. 3,000 for new schools or classes; and Rs. 2,000 for Urdu schools. In the northern division Rs. 1,200 were assigned for scholarships, and Rs. 1,200 for giving free books, etc., to encourage girls to remain in the higher standards; Rs. 4,200 for additional assistants; Rs. 1,800 for improving the pay of callwomen, and Rs. 1,200 for improving that of tailors or seamstresses employed in the schools; Rs. 1,800 for prizes and contingencies; and Rs. 1,730 for giving the code pay to newly trained mistresses. In the southern division Rs. 2,700 were given for scholarships; Rs. 3,700 for rewards in the shape of cloths, books, and slates; Rs. 2,640 for seamstresses; Rs. 1,500 for improving the pay of callwomen; Rs. 3,288 for contingencies (especially the supply of materials for needlework); and Rs. 1,610 for school gatherings, at Rs. 10 per school. The inspectors unfortunately say little or nothing as to what has been done with these grants; but Mr. Kabraji, the Collector of Bijápur, tells me that the seamstresses generally employed are far from efficient, that the sewing machines recently supplied are rusting away because nobody knows how to use them, and that it would be preferable to employ professional tailors to teach sewing to the girls.

71. **Examination results in primary schools.**—In British districts the total number of primary schools increased from 1,970 with 659,729 pupils to 16,986 with 671,986 pupils. The number of pupils in the upper primary stage on the 31st March 1915 was 100,552 (including 8,531 girls). In the lower primary stage the number reading printed books was 322,659 (including 50,365 girls); the number not reading printed books was 248,775 (including 61,103 girls). Corresponding figures for the preceding year for British districts only are not available. The number of pupils presented in the higher standards in British districts was as follows:—In standard V 18,343, of whom 10,424 passed; in standard VI 9,421, of whom 5,269 passed; in standard VII 3,722, of whom 1,981 passed. This is a decrease of 248 in the 5th standard, and an increase of 229 in the 6th, and of 120 in the 7th.

72. **General.**—Mr. Khare writes that owing to the multiplication of new schools in the last few years a local board school at present is hardly better than an indigenous aided school, and sometimes worse, as it is the interest of the aided school teacher to work hard and please the people. The proportion of trained teachers receiving their code pay has risen considerably, going as high as 90 per cent. in the Poona district; the position of the untrained teachers is universally represented as precarious owing to the general rise in the cost of living. Mr. Khare however was much disappointed with the work of the teachers whom he inspected during his last tour, and also it must be added with the work of the inspecting staff who are supposed to guide them; unsanctioned books were in use, the teaching of geography has in no way improved, the outline maps issued being merely filed by the schools which had received them, arithmetic is taught in the crudest manner, instructions issued are not read, nobody cares how the children hold their slates or books, or how the light falls on them, or how they sit, or how dirty and untidy they are. In the northern division the percentage of teachers receiving their code pay is put down as only 28, in the southern as about 55. Additional assistants are still required in many parts.

73. No special classes for tuberculous children have been instituted anywhere; nor has much progress been made with designs for open-air schools of the Ceylon pattern. Those submitted seemed to be almost as expensive as buildings of the ordinary type; people here seem to be more afraid of the intrusion of wayfarers, cattle, and thieves than they are in Ceylon, and so the designs are not really open after all. Some think that in ordinary villages the school house need not differ essentially (except in having a compound) from the average houses of the village, which are known to last for 50 years without requiring much special repair. Mr. Hatch, the Collector of Poona, writes that the difficulties and delays in getting new buildings erected are most disheartening, and suggests that an officer should be lent to prepare at least half a dozen type plans to choose from, some of which should be buildings guaranteed *not* to last longer than 30 years, as it is scarcely to be supposed that the sanitary and educational authorities of the future will be satisfied with the requirements of the present generation.

74. Two school excursions were undertaken in the Sátára district; in one case Mr. G. C. Dike, an assistant deputy, took a party to some caves in the Karád táluka; the other was arranged by a private body called the Dudhgaon society for the spread of education amongst Jains. Lectures about the war were given freely by the inspecting staff; Mr. Ghanekar and Mr. Dike in Sátára, Mr. Toro in West Khándesh, and Mr. Bakarali at Nandurbár are specially mentioned in this connection. Gatherings were held in some of the big girls' schools in the southern division, which were attended by many of the parents of the girls, and these are found to impart a useful stimulus to the cause of girls' education. In Sind football is spreading from the Lárkána district (where a successful tournament was held) to the others, and has been introduced into the training college; gymnastics are not popular and the apparatus is rarely used. The masters at first did not understand the use of the stereoscopes distributed, but when the boys get hold of the effect their interest is very great, and the adjoining zemindárs occasionally borrow the apparatus for their own families. It is to be hoped that similar pains have been taken elsewhere to make the masters understand the use of the stereoscopes, and that they have not merely been "filed" along with the outline maps. The appointment of a Gujaráti assistant deputy at Karáchi is proving very successful, as Mr. Bhat is a keen schoolmaster, and not only finds out what is wrong in a school, but shows how it can be put right. Quinine was administered regularly in most of the Sind districts, but the only statistics come from Lárkána, where the malaria season prevails for three months; one tabloid was given to each boy on every working day, and in all 196,756 tabloids were distributed. The number of boys concerned was 7,195, and the number attacked by fever was 1,409. A general scheme for the administration of quinine in malarious regions, estimated to cost about Rs. 50,000, had to be postponed. In connection with the experiments on school hours it was decided to increase the number of holidays in boys' schools from 30 to 35.

IV.—EDUCATION OF SPECIAL CLASSES.

75. **Rajkumar College, Rajkot.**—As this institution is concerned with the Native States, and submits a detailed annual report for the information of Government, it does not appear necessary to give details of it here beyond saying that the year began with 25 Kumárs and ended with 28.

76. **Girásia and Talukdari schools.**—Attendance in the Gondal school declined further from 50 to 47, and at Wadhwán from 65 to 64. Apart from these the number of Girásia boys attending secondary schools increased from 323 to 557, whilst those attending primary schools fell from 2,809 to 2,714. The number of girls under instruction declined from 323 to 290. The Tálukdári school at Godhra had 25 pupils instead of 23, and was well conducted, as was also the Scott college at Sádra with 35 pupils. The hostels at Dhandhuka and Nadiád are said to supply a real want. The number of pupils increased in the Ahmedabad district from 1,043 to 1,149, and in the Kaira, Panch Mahals, and Broach districts from 117 to 123.

77. **Mahomedans.**—In the last report the total number of Mahomedans under public instruction was wrongly given as 199,061; this was the number under public and private instruction taken together. In 1914-15 the number under *public* instruction in British districts and Native States taken together increased from 155,047 to 157,637, of whom 124,752 were in the British districts; these included 22,271 girls. If we take British districts only, there were 134 in arts, and 51 in professional colleges; 4,962 in secondary schools; 118,928 in primary schools; 267 in training institutions; and 410 in special institutions. I notice that 67 passed the matriculation, 40 the intermediate in arts, science, or commerce, 16 the B.A., and 3 the M.A., examination. Professional examinations were passed by 13. The school final examination was passed by 46, and the vernacular final by 457, of whom 52 took Urdu as a second language, and 9 (out of 31) passed in all the subjects in Urdu.

78. In the central division in British districts there were 27,679 boys and 7,346 girls under public instruction. The number of Urdu boys' schools increased from 198 to 220. East Khándesh is ahead of all the other districts in respect of Urdu education, and hailed the purely Urdu standards with delight; but quite a number of teachers are already reported to be unable to teach them efficiently. The Nasirabad school, with a small boarding house, is intended to serve as a central and model school. In the Násik district Málegaon is the centre of Urdu education, and has a school of 631 boys; but the municipality is said to pay scant attention to the needs of the Mahomedans. The Násik assistant deputy was inclined to think that the new standards were not to the taste of the Mahomedans at large, as they were likely to prove detrimental to their future welfare. On the other hand in Ahmednagar the Mahomedans have taken kindly to the new standards. In Poona progress is hampered by the want of trained and qualified teachers. The new standards are not viewed with much favour in West Khándesh, where the Dhulia municipality protested against the introduction of such sweeping changes. In Sholápur the only school worth the name is the Local Board school at Valsang, where many Hindus asked for permission to place their children under the Mahomedan headmaster rather than in the Maráthi school. Sátára is the most backward district of the division in respect of Urdu education, and it is doubtful if the staff will be able to teach the new standards successfully. In Bombay city one school has opened a fifth standard. Of 734 teachers working in the Urdu schools of this division more than 50 per cent. have passed no qualifying examination. Mr. Kazi vacated the Mahomedan deputyship at the end of the year, on transfer to the headmastership of the Garud high school, Dhulia.

79. The inspectress of Urdu girls' schools in the central division reports an increase in the number of such schools from 46 to 62, and in the number of pupils from 3,109 to 4,023. There were also 2,973 girls in boys' schools. The inspectress complains however that the mofussil municipalities pay no attention to the urgent requests of inspecting officers regarding the necessity of opening new schools within municipal areas. Nearly all the women teachers in these schools are untrained and unqualified, and memorizing

is their only method; the sewing taught is of little practical use. The inspectress accordingly wishes to see the central school at Poona (which had an average number of 89 girls on the roll during the year) developed into a normal school. The boarders at this school were nine in number, eight of them receiving stipends.

80. In the British districts of the southern division there were 18,908 boys and 4,645 girls under public instruction. The special deputy, Mr. Bangi, reports that the number of Urdu schools and classes fell from 278 to 276, of which 24 were for girls; the number of pupils increased from 14,469 to 14,192, of whom 4,089 were girls. Out of 461 Urdu teachers in this division 58 per cent. have passed no qualifying examination. The new standards are said to have evoked a chorus of disapproval, grave objection being taken to Urdu being adopted as the sole medium of instruction. On the one hand a large number of the Mahomedans are quite content with Konkani or Kánarese, on the other many of the teachers are not able to put together two sentences of Urdu correctly. Of all the Urdu schools in the division the best are those at Hubli, well equipped and well manned.

81. In the British districts of the northern division there were 19,187 boys and 4,148 girls under public instruction. The Urdu schools increased from 141 to 150, and the pupils in them from 11,484 to 11,520. The Ahmedabad deputy reported that the new standards had not met with much success on account of the weak staff and the want of suitable text books. The president of the Broach district local board forwarded a representation from the Bohras of that district to the effect that the new standards were not suited to their children, who required to be taught in and through Gujaráti. The Broach deputy reports very favourably on the Tankaria central school, which passed 8 out of 11 at the vernacular final and 4 into the training college. The experimental first year Urdu training class at Ahmedabad had 36 pupils (against 13 in the preceding year), of whom 4 belonged to the central division, 4 to the southern, and 5 to Bombay.

82. In Sind there were 35,296 boys and 5,908 girls under public instruction. The staff of the Sind Madressa has been much improved, and the institution continues to do well; it had 450 pupils, including 160 boarders. In local board schools the employment of mullas on Rs. 4 per mensem has on the whole been fairly successful, and has brought about some increase in the number of Mahomedan pupils. The mulla schools were 587 with 14,021 pupils against 600 with 14,495 pupils in the previous year, the falling off being partly due to the opening of new local board schools. The new deputy for mulla schools was working in the Nawabshah district, where the indigenous schools increased in number from 96 to 126, and the pupils from 2,601 to 3,751. A special training class for mullas was held at Kandiaro, and was attended by 37 in all; Mr. Hesketh was favourably impressed with the progress made. With the scholarships of a total value of Rs. 1,224 that have been sanctioned 55 boys have been sent from mulla to local board schools. These scholarships are a portion of a provision of Rs. 3,312 made in November 1914 for awarding additional scholarships to Mahomedans in primary schools. Some progress has been made in recruiting Mahomedans for the department in Sind, and out of 147 men at the training college 64 are Mahomedans.

83. Copies of the Urdu version of the revised standards (sanctioned in December 1913) became available in September 1914. From the remarks already quoted it will have been seen that a somewhat mixed reception has been accorded to these standards, which were introduced at the pressing request of some of the representatives of the Mahomedan community, and which are understood to have been unanimously supported by the Mahomedan educational conference meeting in Poona in September 1914. Those Mahomedans who do not accept the view that Urdu is their natural and only vernacular are disposed to press for the study of the local vernacular being made compulsory (instead of optional), and for arithmetic being taught through its medium. A pamphlet on the problem of Urdu teaching in this presidency was published by Government in the course of the year, and another on recent developments in Mahomedan education. The committee appointed to report on the subject

of Mahomedan education has submitted its recommendations to Government; the proposal for central schools and special allowances to teachers mentioned in paragraph 96 of the last report was amongst the matters dealt with. As the provision of an adequate supply of Urdu textbooks has become an urgent matter, a new Urdu textbook committee has been constituted; the books submitted are sent to the special Mahomedan deputy of the central division for preliminary report, and then on his advice to the committee, which consists of three official and three non-official members, presided over by the deputy director of public instruction. Since the institution of the committee Urdu books on all sorts of subjects have been pouring in, and over a hundred have already been reported on. Plans and a scheme for the Anglo-Urdu high school to be founded in the neighbourhood of Poona by Sir Fazalbhoy Currimbhoy were under consideration during the year.

84. **Aboriginal and hill tribes.**—In the British districts of the presidency proper the total number of pupils declined from 21,964 to 21,833; there was a falling off of 34 in the central division, and of 98 in the northern, and an increase of 1 in the southern. In the central division the 4,891 pupils included 132 girls; three Kolis and four Bhils passed the vernacular final. In the Akola Dangs of the Ahmednagar district 13 schools had to be closed for want of attendance and of suitable teachers. The Koli teacher sent to the Poona training college could not follow the instruction given there, and had to return at the end of one term. Boarding houses are maintained at Ambegaon and Ghoda in the Poona district, at Peint in Násik district, and at Nandurbár and Kukurmunda in West Khándesh. A grant of Rs. 7,000 was received from the trustees of the Sir Sassoon David fund for a hostel for Kolis in the Dangs, and the work is in progress.

85. In the northern division the figure of attendance (15,707) includes as usual the Kolis and Dharalas of the Ahmedabad and Kaira districts; the Kaira district accounts for the slight decrease noticed above, which is explained as due to the abolition of the fourth and fifth standards in rural schools. The people purely belonging to these tribes are mostly to be found in Surat, Panch Mahals, and Thána. Four boarding schools are maintained for them, at Godsamba, Dohad, Diva, and Mokhada. The first continues to maintain its splendid reputation, having passed 8 out of 8 at the vernacular final, and 2 into the training college, one of whom has his wife at the training college for women. The Dohád Bhil school also did very well, passing 8 out of 9.

86. In the southern division the 1,235 pupils included 139 girls. The management of two special schools for the criminal tribes at Bijápur and Bágalkot was resumed by the assistant collector on special duty from the Basel mission. The total number of children of these tribes in all schools in the Bijápur district fell from 281 to 214, which is attributed to the withdrawal of a number of children for harvesting, and also to the discontinuance of scholarships to some of them by the assistant collector. In February 1914 Mr. Starte had his allotment from provincial funds increased by Rs. 200 for additional scholarships, and by Rs. 700 for a carpentry class. This class is giving useful training to many of the boys, and has supplied most of the furniture required for local board schools in the district. Mr. Desai, a district deputy collector in Kolába, kindly gave a feast and some good advice to the Katkari boarders at Neral. This school is well managed, and the boys appear to be well behaved and quite happy, but the inspector doubts if the mental part of their education is as well planned as the moral; he was struck by the sublime indifference of many of the boys to their work, and thought that the teaching of some trade or handicraft might be of more use to them and have a more settling effect upon them.

87. **Depressed classes.**—In the British districts of the presidency proper the total number of pupils declined from 28,889 to 28,681; there was a falling off of 375 in the central division, and of 150 in the northern, but an increase of 317 in the southern. The vernacular final was passed by 25 in all. In the central division the 17,285 pupils included 1,558 girls. Two are attending the Poona training college; but the Mahár who was in the second year class at Dhulia failed, and was sent out with a first year certificate. The

special middle school scholarships reserved for these classes were awarded in Poona, Ahmednagar, Sátára, and Násik. The inspector does not offer any explanation of the falling off in numbers; nor is any given in the case of the northern division, where there were 5,729 pupils, and where the special scholarships were awarded in Broach, Surat, and Thána (2). In the southern division, where there were 5,667 pupils, the only special scholarship awarded was in Kolába, the deputy of which remarks that special scholarships would be more usefully spent on encouraging them to complete their vernacular education than on English education. In this division 5 Dheds appeared for the vernacular final and 2 passed.

V.—SPECIAL INSTRUCTION.

88. In British districts the number of institutions for special instruction decreased from 123 to 119, and that of pupils from 7,079 to 6,837.

89. **Secondary training college.**—The college was at work only during the monsoon term of 1914, at the end of which Mr. Fraser returned abruptly from his furlough on account of the outbreak of war. The subject of First Aid was made compulsory, and all of the students attended the St. John Ambulance Association class and obtained the certificate. A voluntary class in Home Nursing was then organized for the holders of the certificate; 11 students appeared for the examination, of whom 5 passed. Of the 35 students examined 33 obtained the college diploma. The 24 boarders continued to suffer much inconvenience during the rains from the exposed nature of the hostel, and although the executive engineer was approached nothing has been done. The principal's bungalow was completed and occupied.

90. The experimental training class in Poona, referred to in paragraph 109 of the last report, was continued. Out of 5 teachers under training continuously from March to August 1914 3 passed the secondary teacher's certificate examination in both parts, 1 failed in part II, and 1 did not appear; others who had been under guidance for part of the time resigned, and the time spent upon them was thus thrown away. Between August 1914 and March 1915 14 teachers were under training. The average attendance at the weekly lectures given by Mr. Acharya and Mr. Sane was 25. Such distrust and apprehension as manifested themselves at the beginning of the experiment seem to have evaporated, but it is curious to note that even now graduates think it beneath their dignity to seek any professional guidance. Some misconceptions about the direct method of teaching English have, it is hoped, been removed, and some improvement has been effected in other ways in the elements of teaching and of class-management. In order to supplement the work of the instructors and to make it better known a series of public lectures was arranged by the educational inspector during the rains of 1914. But, as Mr. Khare observes, it is human nature to regard all unsolicited advice with suspicion, if not actual resentment; and in a printed report the superintendent of the Nutan Marathi Vidyalaya remarks that "an impression remains that, having regard to the self-reliant administration of a school like this, it is not a very satisfactory and convenient method of supplying trained teachers to aided schools, as it would appear to presuppose incapacity on the part of the managers to do for themselves what the instructor is expected to do." The superintendent accordingly suggests certain steps whereby the school would supply the place of the instructor. The leaven appears to be working, and if all the Poona schools would follow the same course it would be possible to transfer the instructors to some other centre, as the prospects of an extension or duplication of the secondary training college are not very rosy at present.

91. **Vernacular training institutions.**—At the Poona training college for men the number on the roll increased from 280 to 283, of whom 51 were in the third year and 113 in the second; of the total number 42 were Mahomedans, 8 belonged to depressed classes, and 3 to aboriginal tribes. At the certificate examination (which includes outsiders) 75 passed in the third year, 143 in the second, and 164 in the first; altogether 382 passed out of 447 examined. Of Mahomedans 36 passed out of 41 examined, and of the depressed classes 6 out of 6. At the ensuing entrance examination 363 competed and 119 were admitted. Of Mahomedans 17 out of 23 were admitted, though only 7 did well in the examination; of the other backward classes 25 out of 76; and of the depressed classes 4 out of 5. The college was in charge first of Mr. G. N. Khare, and then of Mr. D. S. Sawa ar. All of the students were induced to undertake some gardening, and the drawing master has kindled some real enthusiasm for clay modelling; a special class of 30 was initiated into Mr. Wren's physical exercises. Both the college students and the practising school boys were taken to various places of interest in or near Poona; the former also to Bombay, and the latter to the Karla caves. Moral instruction was given regularly, and the students were also practised in giving such lessons; and twelve lantern lectures were given by members of the staff. The college

report also notices terminal gatherings, students' debates, special lectures, staff meetings, model lessons, a teachers' reading table and reference shelf. The average monthly food charge was Rs. 9-5-2 for Hindus and Rs. 8-2-8 for Mahomedans. In the practising school attendance increased from 176 to 202, and 11 out of 14 passed the vernacular final.

92. The Dhulia training school was in charge first of Mr. R. G. Apte, and then of Mr. A. R. Kale. The number of students rose from 165 to 170. At the certificate examination (including outsiders) 77 passed in the second year, and 88 in the first; altogether 165 passed out of 168, among them being 27 Mahomedans and 3 Mahárs. At the entrance examination 205 competed, and 85 were admitted; out of 16 Mahomedans all were admitted (but 7 only as special cases), and 3 out of 4 from the depressed classes. An excursion was made to Aurangabad, Daulatabad, and Ellora caves. The inmates of the hostel suffered as usual from malaria. In the practising school attendance declined from 208 to 195; and 14 out of 16 passed the vernacular final.

93. The Poona training college for women was in charge of Miss Newland. In November 1914 an assistant lady superintendent was appointed specially for looking after the high school, and three additional teachers having been added to the high school staff, it became possible for the college staff to devote itself entirely to the college. The number of students declined slightly from 123 to 121. At the certificate examination (to which some outsiders were admitted) 32 passed in the fourth year, 22 in the third, 41 in the second, and 21 in the first; altogether 116 passed out of 138. At the entrance examination 47 were examined and 43 passed, of whom one was a Mahomedan. The curriculum has been experimentally rearranged to make it more practical. Of the 19 girls who presented themselves for the examination in First Aid all passed. A teachers' association has been started in order to keep the primary school teachers in touch with the college and its methods; monthly meetings are held, and a magazine has been started. Excursions were made to Bombay, and to places in or near Poona. The numbers in the practising school, reduced in the preceding year from 321 to 298, had to be still further reduced to 223 to make room for the high school classes. At this rate the inspector calculates that there will be only 10 pupils left in 1917. The reason is that the buildings belong to the Maharashtra Female Education Society, who are more interested in the high school than in the training college and its practising school; the present system of dual control of these institutions is far from satisfactory, and now that the interests of one portion are being sacrificed to those of the other it is eminently necessary to separate the college from the high school as soon as financial conditions permit.

94. The Union training school at Ahmednagar had 55 students against 66 in the preceding year, and passed 17 candidates out of 25 presented. There were 5 normal classes for women teachers in this division, with a total of 83 students. At the normal examination for women teachers in aided Maráthi schools 43 were presented and 34 passed.

95. At the Dhárwár training college for men Mr. R. D. Nadkarni acted for a time as principal during the deputation of Mr. V. B. Joshi. The number of students decreased from 319 to 311, of whom 37 were Mahomedans, and 2 belonged to the depressed classes. At the certificate examinations 24 passed in the third year, 127 in the second, and 157 in the first; altogether 313 appeared, and 308 passed, of whom 34 were Mahomedans. At the entrance examination 458 appeared, and 124 were admitted. Of Mahomedans 12 out of 20 were admitted, and both the candidates from the depressed classes; 4 more Mahomedans were sent to the special class at Ahmedabad. Moral instruction does not form part of the curriculum, but weekly lectures are delivered by the staff which include discourses on morals; the principal, however, has more confidence in the corporate life of the college. The average monthly boarding expenses were Rs. 7-6-5 for Brahmins, Rs. 6-6-11 for Lingayats, and Rs. 6-14-2 for Mahomedans. Lantern lectures were given, and an excursion made to the Gersappa falls; the stereoscopic pictures are being largely used in the school as well as the college. In the practising school attendance increased from 301 to 309, and 15 out of 26 passed the vernacular final.

96. In the Dhárwár training college for women, which is under Miss McAfee, the number of students decreased from 65 to 58; it is said that seven were frightened away by the proposal to take legal agreements from their guardians. Of the 58 one is a Mahomedan and one a Dhed. At the certificate examination 8 passed in the third year, 9 in the second, and 11 in the first; altogether 28 passed out of 31. At the entrance examination 37 appeared; 17 were admitted to the first year class and 13 to the preparatory class. An excursion was made to Mysore, Seringapatam, and Bangalore. Moral instruction is given chiefly by lectures, lantern lectures have been given, the stereoscopes are used, and the war telegrams are translated into Kánarese and posted up. Miss Fielding has worked improvement in the drill and physical exercises; and swinging and skipping are popular. The additional class rooms, taken into use from September 1914, are a great improvement. Weekly gatherings of teachers from the neighbourhood are held, and in September there was a three days' meeting of teachers from the districts. In the practising school attendance declined from 163 to 147, which is attributed to greater strictness in removing the names of absentees from the rolls; a seventh standard class was opened with two girls who were eager to continue. There are also 7 ladies attending a special class.

97. At the Premchand Roychand training college for men, Ahmedabad, Rao Saheb Shastri and then Mr. K. A. Bala succeeded to the principalship. The number of students increased from 278 to 293, of whom 36 belonged to the special Urdu class, and 50 were untrained teachers. At the certificate examination (including outsiders) 34 passed in the third year, 85 in the second and 219 in the first; altogether 338 out of 405. Of Mahomedans 23 passed out of 29. At the entrance examination 623 competed, and 106 were admitted; out of 28 Mahomedans 6 were admitted (four as special cases) to the Gujaráti side, and 8 to the Urdu class. An excursion lasting a month was made to Jaipur, Bharatpur, Agra, Fatehpur Sikri, Muttra, Delhi, Ajmer, Udaipur, and Chitor. The monthly boarding charge ranged from Rs. 7-8-0 to Rs. 8-0-0. In the practising school the number of pupils rose from 228 to 253, and 10 out of 11 passed the vernacular final.

98. At the Mahálaxmi training college for women, Ahmedabad, Miss Chubb returned from furlough. The number was reduced from 160 to 140 in order to avoid inconveniently large classes. At the certificate examination (including outsiders) 27 passed in the third year, 43 in the second, and 63 in the first; all the four Mahomedans passed. Figures for the entrance examination have not been given, except that two Mahomedans out of three were admitted, so that there are now five in the college. Excursions were made to places of interest in or near Ahmedabad. In the practising school the number of pupils increased from 149 to 150.

99. In the northern division the Irish Presbyterian Mission training college for men at Ahmedabad was recognized. It presented 26 pupils at the first year examination of the Premchand Roychand training college, and 24 passed. There are two aided normal schools for women, managed by missions, one at Ahmedabad and the other at Godhra; in the former the number fell from 34 to 31, whilst at Godhra it rose from 12 to 30. The Godhra school is the more satisfactory of the two.

100. At the Hyderabad training college for men the number of students declined from 182 to 166. At the certificate examination 24 passed in the third year, 57 in the second, and 79 in the first; altogether 160 passed out of 204. The number of Mahomedans who passed was 71. There is no entrance examination in this case. The inspector explains that all the vacancies were not filled up, because the district local boards cannot afford to pay a large number of trained masters without special grants from Government, which are not likely to be forthcoming in the near future. The masters are now being trained less in theory than in the practical handling of ordinary school subjects. Moral instruction is given, and football and a number of indigenous games have been introduced. A students' library and reading room has been fitted up from a special grant of Rs. 800. An excursion was made to Karáchi and Tatta. The number of pupils in the practising school has not been reported.

101. In the college for women at Hyderabad the number rose from 26 to 30 ; 4 passed in the third year, 9 in the second, and 15 in the first, or 28 in all out of 50 examined. The number of Mahomedans who passed was 11. The number in the practising school increased from 96 to 140, and the staff was scarcely adequate for the increased numbers. The teaching of English in the higher classes of the practising school seems to have increased the attendance, but experience showed that an English mistress would not remain at the college for the pay offered. The headmistress of the school was rewarded by the Commissioner in his darbár at Hyderabad. Miss Brooke dwells on the inadequacy of the accommodation now that there are 18 boarders, and the inadequacy of the staff to exercise supervision over the work of the students in the practising school.

102. In British districts the total number of primary teachers increased from 19,900 to 20,521 ; that of men from 18,863 to 19,332, and that of women from 1,037 to 1,189. Women were therefore 5·7 of the whole. Among the men trained headmasters increased from 3,718 to 3,881, while the untrained decreased from 4,364 to 4,227. Trained assistants increased from 2,909 to 3,200, and untrained assistants who have passed a qualifying examination from 5,674 to 6,582 ; but assistants who are neither qualified nor trained decreased from 2,198 to 1,442, which is as it should be. The percentage of trained men rose from 35·1 to 36·6. Ráo Bahádur Shastri remarks that untrained assistants, whether qualified or not, are not easy to get on nine or ten rupees, and when found do not stick to their posts ; and suggests that the output of first year men from the training colleges should be increased.

103. Among the women trained headmistresses increased from 365 to 383 and untrained from 53 to 65. The number of trained assistants rose from 172 to 230 ; that of untrained but qualified assistants from 36 to 91 ; and that of assistants neither qualified nor trained from 411 to 420. The percentage of trained women continued to be 51.

104. In the British districts the average pay of a trained headmaster in a primary school under a district local board rose from Rs. 25-8-10 to 26-7-5 ; under a municipal board it declined from Rs. 33-4-2 to 32-15-5, probably owing to younger men being taken on. The average pay of a trained headmistress in a primary school under a district local board rose from Rs. 26-3-0 to 26-8-3, and under a municipal board from Rs. 28-2-4 to 28-5-1. For the untrained in local board service, the average pay of a headmaster was Rs. 11-5-10 ; of a headmistress Rs. 11-10-7 ; of an untrained but qualified assistant Rs. 9-8-2 (men) and 9-7-3 (women) ; and of untrained and unqualified assistants Rs. 9-5-0 (men) and 9-5-7 (women).

105. The local normal classes referred to in paragraph 124 of the last report were continued. In the central division they were given a revised curriculum, and are reported to have been conducted with sufficient care and zeal. The same was the case in the northern division, where two men from one of the classes passed the first year examination of the training college. In the southern division they are continuation classes, and the men coming from them have proved far more satisfactory material as teachers than fresh vernacular final men. There are in all 66 scholarships of Rs. 5 each sanctioned for these continuation classes, but all the scholarships allotted to Kánara and Kolába were not taken up ; the reason seems to be that the prospects are not considered sufficiently tempting, nor are Rs. 5 sufficient inducement, and the Kolába deputy suggests that 20 scholarships of Rs. 5 might be converted into 11 of Rs. 9. The special class in the Hyderabad training college continues to do useful work, and one or two of the best men in it were given stipends for the second year class in the college proper. Attendance at the class is also made a condition of obtaining the special certificate awarded after 15 years' meritorious service.

106. **Sir J. J. School of Art, Bombay.**—Though four months and a half have elapsed since the end of the official year no report has been received from the principal of this institution. The number of pupils decreased from 372 to 370, of whom 249 were Hindus, 56 Parsis, 31 Indian Christians, 19 Mahomedans, 11 Jews, and 4 Europeans or Anglo-Indians.

107. **Drawing classes.**—In British districts the number of these increased from 192 with 38,862 pupils to 221 with 43,631 pupils. The examination in the three grades was held as usual at various centres in November, and a supplementary examination in March, after which the old first grade examination was abolished. In the first grade the number of candidates increased from 7,259 to 8,653, and that of passes from 4,725 to 5,154, the percentage falling from 65 to 59; 26 prizes were awarded. In the second grade the number of candidates increased from 2,321 to 3,371 and that of passes from 1,667 to 2,063, the percentage decreasing from 71 to 61; 10 prizes were awarded. In the third grade the number of candidates increased from 1,242 to 1,767, and that of passes from 1,144 to 1,221, the percentage decreasing from 92 to 69; 17 prizes were awarded. The total number of candidates examined in the three grades increased from 10,822 to 13,791. The examiners reported that the general standard of the drawings sent in for the first and second grades was satisfactory. The third grade work was not as good as in the preceding year; the best work here was the drawing and colouring of plant forms, while the designs, which are intended to bring out the individuality of students, were remarkable for the little originality they displayed, and for the stereotyped lines on which all the candidates from any one school worked them out.

108. The first inspector of drawing and craftwork, Mr. Hoggarth, arrived in November 1914; his first report therefore deals with his general impressions derived from the fifty schools which he had visited, and from what he had seen of the drawing examinations. He considers that the proper teaching of drawing is greatly handicapped in consequence of the lack of the necessary material equipment and of the unfavourable conditions under which the teachers are working. In many cases the work is done in an ordinary classroom, badly lighted and overcrowded; and even when a drawing hall has been provided, its shape, aspect, lighting, and wall space seem to have received little consideration. Furniture is often unsuitable, and there is a lack of objects and natural specimens suitable for representation. There is an entire absence of casts, coloured representations, and photographs of ancient and modern work; whilst the present custom of covering the walls with charts and pupils' work cannot be expected to stimulate and educate the artistic sense in any pupils. Pupils should not be supplied with colours already mixed to the tint required, nor allowed to bring all sorts of materials of their own; materials should be standardized and obtained from the school. Coming to the general character of the work done Mr. Hoggarth distinguishes between the work of the pupils being prepared for the examinations, which is of a very fair standard, and the work of the great majority, which is of a very low standard. The teachers naturally pay much greater attention to the examination pupils, and thus those who require most attention and teaching get the least. In general the work in which the pupils show to advantage is anything which can be done by mechanical means or set rules, but in any work requiring individual thought and judgment the result is poor. The cause of this lies in the out and dried methods of the teachers, which tend effectually and permanently to kill intelligent observation and reasoning on the part of the pupils; and thus it comes to pass, as Mr. Fraser has remarked in his report on his tour, that a school may stand opposite to an old temple or an old fort, and yet no one seems impelled to sketch them. The faults of the teachers, again, may be attributed to the character of the training given in the normal class of the School of Art, which almost entirely neglects such important matters as the method and practice of teaching drawing, the proper arrangement of the drawing syllabus and classrooms, and the correlation of the drawing lessons with other school subjects. As to the examinations Mr. Hoggarth remarks that they entirely govern the preparation of the special pupils, whilst the rest are generally given a chart to copy to keep them quiet, and receive little or no instruction. The actual conduct of the examinations leaves much to be desired, there being a general disregard of the regulations and instructions issued from head-quarters. The objects furnished for the model drawing examination often bear little resemblance to those set by the examiners; the pupils of the school itself are favoured at the expense of those attending it as a centre; in one case the candidates were left in sole charge of the drawing teacher (strictly forbidden by the rules), and he was found fast asleep in a long chair outside

the room; many of the superintendents were quite unaware of a special circular issued before the March examination, and those that were aware of it had not read it; and in short, owing to the lack of proper supervision and the disregard of the rules, it is probable that the drawing grants which Government have been paying have not always been legitimately earned. From all of this it will be seen that it was high time that the overburdened staff of the School of Art should be relieved of some of the work they have carried on for so many years in connection with the teaching and examining of drawing in the ordinary schools.

109. **Sloyd.**—Government having approved of the introduction (so far as funds permit) of the sloyd system of manual training into the Government secondary schools and vernacular training colleges, the services of Mr. S. Srinivasa Rao were borrowed from Mysore, and he reported himself at Dhárwár on May 21, 1914. The obtaining of the necessary equipment, the preparation of type plans for sloyd rooms and lists of equipment, the visiting of the institutions concerned, and the selection of 20 teachers to be trained took up his time till the end of December, and it was not till January 4, 1915 that the first sloyd training class was opened in the Savanur bungalow, adjoining the Dhárwár high school, which had been fitted up for the purpose. Of the members of the class one came from the normal class of the college of engineering, two were manual training instructors, and the rest were graduates innocent of any work of this nature. The class worked steadily at paper sloyd till the 24th of February, when it was introduced to wood sloyd. At the end of the first term only one had shown himself quite unfitted for the work. Classes for practice in teaching are borrowed from the Dhárwár high school. Plans and estimates for the necessary sloyd rooms were called for in February, but six months later they are still to seek, and it is clear that when the trained masters are ready for work next December, there will not be a single room ready for them to work in, except at the Dhárwár training college. Moreover these rooms are going to prove so expensive that it is not likely now that the experiment can be carried so far as was originally intended.

110. **Victoria Jubilee Technical Institute, Bombay.**—The attendance at this institution decreased from 337 to 233, of whom 159 were Hindus, 48 Pársis, 12 Indian Christians, 8 Mahomedans, 4 Europeans or Anglo-Indians, and 2 Jews. The decrease in numbers was due to the entrance examination having been shifted from January to June. The average age of the students was 18. Considerable additions were made to the equipment of the mechanical engineering and textile departments; the demand for admission to the electrical engineering section is nearly double of the room available; the chemical section is increasing in popularity. The head of the sanitary engineering and plumbing department having gone on active service in September, some difficulty was experienced in replacing him. The motor mechanics and handloom weaving classes continued to work, but there is a falling off in the latter as the district local boards cannot get the sons of *bond fide* weavers to attend. In the diploma examinations held in December 1914 25 certificates were awarded for mechanical engineering, 9 for textile manufacture, 23 for electrical engineering, and 1 for technological chemistry; 31 certificates were given for motor car work, and 8 for handloom weaving. Some progress was made with the scheme for removal to a new site at Mátunga, and plans for the necessary buildings were in preparation.

111. **Industrial and technical schools.**—In British districts the number of schools or classes decreased from 63 to 57, and that of pupils from 4,827 to 4,347; of these 23 were independent institutions, with 1,668 pupils. The committee of direction for technical education, which assumed control in April 1914, has classified these institutions as follows:—

1. Those which give instruction in theory and practice, without literary subjects (technical schools proper).
2. Those which give practical instruction, with little or no theory, and no literary subjects.
3. Those which add literary instruction to the manual or practical instruction given.
4. Those which add manual training to the literary instruction given.
5. Girls' schools.

The number of schools of which the committee has assumed control for the present is 18; the grants in aid paid on account of these amounted to Rs. 59,457, whilst Rs. 9,002 were paid on account of schools not taken over by the committee. The appointment of two whole-time inspectors was proposed, but could not be sanctioned on account of the financial situation; accordingly the annual inspection was carried out by three members of the staff of the V. J. Technical Institute. The examination was conducted on a systematic basis, and in addition the committee, at the request of Government, inspected and examined seven more institutions for the purpose of assessing grants in aid, and examined candidates from three institutions for manual training certificates. Arrangements are being made for the preparation of textbooks on engineering and textile subjects.

112. The following are a few extracts from the examiners' reports on the work of individual schools under the control of the committee.

Ahmedabad, Ranchchodlal Chotalal Technical Institute.—Results fairly satisfactory, but the authorities are aiming at a standard which is impossible of attainment with the present staff and equipment.

Ahmednagar, Sir D. M. Petit School of Industry (weaving).—The want of a systematic course of work is the weakest part of the school.

Dhulia, Technical School.—One of the most promising of the mofussil schools and likely to grow considerably in the future.

Borsad, Mission Industrial School.—The teaching is slack and indifferent in character, and the work done poor in quality.

Nadiád, Mission Industrial School.—Is doing really good work particularly in the mechanical section.

Bárdmati, M. V. E. Society's School.—From the industrial point of view the school does not appear to be doing any useful work, and with the equipment and tools available it was found impossible to conduct any examination of a practical nature.

Sirur, Sir D. M. Petit Industrial School.—Results satisfactory. The amount put down as salary for the superintendent, viz., Rs. 400 per month, is out of all proportion to the size of the school and the amount of work done.

Sátára, School of Industry.—The results on the whole are satisfactory, but better results may be obtained by strictly examining all students' work, and refusing to accept anything which is not up to standard. The work done in the weaving section is very good.

Pandharpur, Robertson School of Industry.—The work is of fair quality. The superintendent should make himself better acquainted with teaching methods, and prevent commercial work interfering with educational work.

Sukkur, V. J. Technical Institute.—The results are well above the average, and show that care is taken to turn out well trained and useful men.

Surat, Parekh Technical Institute.—Found to be satisfactory. Less outside work should be undertaken, as it is not possible to run the school as a commercial undertaking without interfering with the educational work.

113. **Reformatory schools.**—At the David Sassoon Institution, from which no report has been received, the number of boys decreased from 235 to 211; at the time of inspection Mr. Khare reported that the methods of work in the literary subjects were crude and unintelligent, and that few of the boys cared for gardening, for which purpose a plot of ground had been laid out. At Yeravda the year 1914 opened with 138 boys, and closed with 131, of whom 100 were Hindus, 24 Mahomedans, and 7 Indian Christians. Eleven of them were serving out on license. Six boys absconded during the year, but five of them were recaptured. Out of 32 admitted 26 were quite illiterate. Of the 140 boys discharged during the last three years only 4 have been reconvicted, and 97 are known to be engaged in honest occupations; 45 are pursuing those learnt in the school. Mr. N. M. Pajnigar, who had been in charge of this school for 14 years, retired and was succeeded by Mr. M. G. Dubal. Manual training together with a revised drawing scheme has been introduced.

114. **Commercial education.**—The Sydenham College has been dealt with separately. In the central division the number of schools decreased from 38 to 26, but that of pupils increased from 1,327 to 1,339 (including 25 girls).

In the British districts of the northern division the number of schools or classes remained 6, but the number of pupils fell from 103 to 95. The usual London Chamber of Commerce examinations were held in May 1914. The number of entries for the senior certificate fell from 718 to 692, of whom 215 passed; the number of entries for the junior certificate fell from 164 to 129, of whom 23 passed. The results show that a considerable number of students are permitted to appear without adequate preparation.

115. **Schools for defectives.**—In the central division the number of schools decreased from 5 to 4, owing to the closing of one at Sirur; the number of pupils fell from 134 to 112, of whom 31 were girls. All are said to be doing very useful and humane work. The only school in the northern division is one for deaf-mutes at Ahmedabad, in which the pupils increased from 28 to 37, of whom 6 were girls. A special grant of Rs. 1,300 was given to the head-master for the purpose of visiting similar schools on the other side of India.

116. **Other special schools.**—In the central division there were 10 Sanskrit schools with 507 pupils; 3 music schools with 1,687 pupils; and 2 Persian and Arabic schools with 174 pupils. An attempt was made to reduce the work done in the Sanskrit schools to some sort of system. In the northern division there were 4 Sanskrit *pathshalas* with 190 pupils; the most efficient of them is the one at Surat.

R. LIBRARY OF THE BOMBAY BRANCH OF THE ROYAL ASIATIC SOCIETY

VI.—ADMINISTRATION AND MISCELLANEOUS.

117. **Administration.**—The central division was under Mr. F. W. Marrs till July 1914, when he went on long leave, handing over charge to Mr. G. N. Khare; Mr. Marrs subsequently joined the new army in England. Amongst the deputies Mr. Bala was transferred from Bombay to the training college at Ahmedabad and was succeeded by Mr. Nayampalli, who was followed at Ratnágiri by Mr. B. M. Kale; Poona was in charge successively of Mr. Sawarkár, Mr. Vangikar, and Mr. Kolhatkar; Mr. A. R. Kale was transferred from Sátára to the Dhulia training school, and was succeeded by Mr. Apte; Mr. Soman at Sholápur was deputed to act as headmaster and was succeeded by Mr. M. K. Joshi; Mr. Shaikh Bakarali was in charge of West Khándesh, and Mr. Pundlik of Násik, where most of his records were destroyed by the burning of the *vada* used as an office. In East Khándesh Mr. Padhye was specially commended for his zeal, energy, and smooth and tactful work.

118. In the northern division Ráo Bahádur R. P. Godbole retired in October 1914, and was succeeded by Ráo Sáheb Shastri. Amongst the deputies Mr. Balsari went to Surat, Mr. S. M. Dalal to Kaira, and Mr. B. N. Desai and Mr. Divanji in succession to Panch Mahás. Special mention is made of Mr. Kadri, who administered his charge (Ahmedabad) with great energy and success; and of Mr. Desai, whose administration of the Panch Mahás and Rewa Kántha Agency, though of short duration, was vigorous and tactful.

119. In the southern division Mr. Lory was on leave from June 1914 to February 1915, Mr. V. B. Joshi acting for him; at this time therefore three out of the four divisions were in charge of Indian officers.

120. In Sind amongst the deputies Mr. R. D. Advani was succeeded in Sukkur by Mr. K. D. Shahani, who was followed at Lárkána by Mr. K. G. Gidvani. Mr. Hesketh says that he has a keen and capable staff, and that he sometimes fears that he has recruited assistant deputies at the expense of the high schools.

121. Personal assistants were given to the four inspectors towards the close of the year, the officers chosen being Mr. Vangikar (Poona), Mr. B. N. Desai (Ahmedabad), Mr. V. N. Ghate (Dhárwár), and Mr. R. D. Advani (Karáchi). This step has relieved the inspectors of some of their routine work, and set them free for more vigilant supervision and inspection, and other important duties. The revision of the clerical establishments in the offices of the director, educational inspectors, and deputies took effect during the year; the strengthening of the clerical staff in the deputies' offices in particular has relieved the assistant deputies of some of their clerical work, and should enable them to visit more schools and to hold more of teachers' conferences. Mr. Khare remarks that if the officer holding such a conference is keen about the real object, these meetings are bound to advance methodical teaching in the primary schools. It gave me great satisfaction that a scheme which I had had in view since 1910 for equalising the prospects of officers in the inspecting and teaching lines was brought into force during the year; under this the inspecting branch has open to it equally with the headmasters' posts of Rs. 500, 400, and 350, whilst the number of posts of Rs. 200 and 250 was reduced so as to secure a better flow of promotion. The inspectorship of drawing came into existence, and a post of superintendent on Rs. 150—10—200 was created in the director's office. Mr. V. M. Dike, first clerk in the same office, went on leave and voluntarily retired before attaining the age of 55 in the interest of the acting incumbents; his long experience in the office and intimate acquaintance with its records are likely to be missed for some time to come.

122. **Departmental examinations.**—The number of candidates from British districts at the vernacular final examination increased from 7,545 to 7,834, and the number of passes from 3,476 to 3,569; the percentage of passes declined slightly from 46 to 45. I notice that the percentage was 59 in Sind, 51 in the central division, 44 in the northern, and only 29 in the southern. The number examined included 17 girls, of whom 14 passed; the number of successful Mahomedans fell from 478 to 457. At the school final the number

of candidates increased from 1,580 to 1,633, and that of passes from 759 to 771, giving a percentage of 47 against 48 of the preceding year. At the secondary teacher's certificate examination the number of candidates increased from 51 to 83, and the number of passes from 30 to 45.

123. **Physical education.**—The two aided gymnasia in Bombay were attended by 132 and 23 pupils respectively, 69 per cent. of these being Parsis. Reference has already been made to this subject in respect of the Government high schools in paragraph 29. In the primary schools in the central division Indian games are being encouraged, but the want of playgrounds is keenly felt. There is a demand for more gymnastic apparatus which is being partially met by the grant of Rs. 1,950 for each of the seven districts of this division. Grants were also given in the northern division, where simple apparatus is being supplied even to rural schools; but the inspector does not find the interest of the teachers and inspecting officers in this subject, or even in personal cleanliness among the pupils, altogether satisfactory. In the southern division some gymnastic apparatus was purchased from special grants, Indian games are played where grounds are available, and there are football teams at Hombal, Ron, and Kalkeri in the Dhárwár district.

124. **Moral education.**—The first meeting of the consultative committee appointed by Government was held at Poona on August 12, 1914, when 17 members out of 25 were present. Mrs. Anderson read a paper on the essential aim of moral instruction, and Shri Mahabhagwat one on the adaptation of moral instruction to Indian needs. The possibility of having peripatetic instructors, model boarding schools, and useful collections of stories, songs, and prayers, was discussed along with other topics. The Sindhi version of the first volume of Mr. Enthoven's extracts has appeared; the other versions are in the press. So far as the Government high schools are concerned this subject has been dealt with in paragraph 30. Mr. Khare remarks that one effect of its introduction has been that a teacher more readily touches upon a question of morality when giving an ordinary lesson. Nothing systematic has yet been attempted in primary schools. The school co-operative societies referred to in the last report under this head have been extended to large local board schools in the Ahmedabad district and to one in Kaira.

125. **Visual instruction.**—Lantern slides continued to be circulated among the Government secondary schools and vernacular training institutions. Lanterns and sets of slides were supplied to each deputy educational inspector and to a good many of the assistants. In the central division they are being well used, and the lectures are reported to have been greatly appreciated; where many have worked well it is almost invidious to pick out two names, but I should like to mention Mr. Ghanekar of Sátára and Mr. Toro of West Khándesh. From the northern division it is reported that the inspecting staff was scarcely prepared to make use of the material supplied, but it is hoped that it benefited by Mr. Ghate's visit. From Mr. Miller's remark that no more lanterns are required, as they "are rather awkward to manage, and assistant deputies have all that they can reasonably be expected to do in examining and inspecting schools," it may be inferred that these newfangled methods are not going to receive much support in the southern division. Mr. V. N. Ghate was placed on special duty for the purpose of coaching the teaching and inspecting staff in the use of the lantern and the handling of slides, and visited every district headquarters except Kárwár and Mirpurkhás. Besides 188 lantern lectures and demonstrations, and 12 moral lessons, he gave 80 day lectures on certain common diseases, their causes and prophylaxis, on the teaching of geography and history as correlated subjects, and on physical culture. He was also deputed for a short time to assist Major Liston, I. M. S., in the preparation of suitable skeleton or model lectures on common diseases of children. Many requests for lectures were received from managers of aided or recognized schools, some of which could be complied with; and I am glad to see an appreciative notice of Mr. Ghate's work in the printed report of the Alexandra Native Girls' English Institution for 1914. Several assistant deputies reported that they had suddenly acquired unprecedented popularity amongst the villagers through the lantern. It has hitherto been a common complaint amongst inspecting officers that they found it difficult to collect people for a talk; but that difficulty is being removed by the

lantern. People press them to stay in their villages, look after their comfort, and undertake the carriage of the apparatus. Whole villages have been known to gather for the lantern show, and to remain till a late hour at night.

"But (writes Mr. Ghate) we have not yet given to our inspectors such material as will interest the children of the lower standards and the people of small villages. So far we have restricted ourselves to what we can get from England. It is necessary to collect slides which will be of local interest, and which will illustrate the geography of the various districts of the Presidency. This will require a good deal of money, which it is hoped will be forthcoming in course of time."

The provision intended for making a start with this work had unfortunately to be cut out of the current year's budget on account of the financial situation, which also prevented a continuance of Mr. Ghate's deputation. I cannot however speak too highly of the zeal and care which he has devoted to this work, often done at his own expense, during the last two or three years.

123. **Teachers' Association.**—The Bombay association had 106 members; several lectures and demonstrations were given during the year.

127. **Students' advisory committee.**—The executive board met regularly every month; the number of corresponding members was enlarged by the appointment of the heads of thirty prominent educational institutions. Complaints have been received that students still proceed to England without providing themselves with the necessary certificates; but it is probable that those who proceed directly to England without consulting the committee are the principal offenders. The number of enquiries made in writing was 185, and by personal visits 140. The number of students who proceeded to England with the knowledge of the committee was 26; of these 2 went for a university degree, 7 for the I. C. S., 6 for the Bar, 2 for the solicitors' examination, 6 for medical studies, 1 for general education, and 2 for the diploma in public health. The number of those who expressed their willingness to be under Mr. Mallet's guardianship was six. The committee believe that they can recognize a marked abatement of the distrust with which their operations and offers of help were at first viewed by the generality of students.

128. **Books and vernacular literature.**—During the year revised editions were published of Maráthi readers I, II, III, IV, VI, and VII; Gujaráti I (boys'), I (girls'), III, V, and VI; Kánarese primer and readers I, II, and III; and Sindhi primer and reader I. The first edition of Maráthi girls' reader I was issued. At the suggestion of the publishers the books were printed on a new kind of paper, and the price was reduced by 9 annas for the set bound in cloth and 4½ annas for the set in paper. Modi readers were also in preparation. The annual statement of the Sind book depôt is printed in the supplement. The year opened with a balance of Rs. 14,010; the sale proceeds rose from Rs. 23,237 to 28,456; and there was a closing balance of Rs. 21,196. The Maráthi book committee considered 28 books; the vice-principal of the Poona training college reported on 57, revised 4, and scrutinized 4 new textbooks. The Gujaráti committee had 30 books before it, out of which it disposed of 21; the Ahmedabad vice-principal reported on 92 books, revised 10, and scrutinized 11 textbooks. The Kánarese committee had 52 books before it, but only disposed of 5; the Dhárwár vice-principal reported on 20 books, translated 2, revised 2, and scrutinized 4. The principal of the Hyderabad training college reported on 44 books, revised 12, and corrected the proofs of 19. Mr. Hesketh reports marked activity in the production of Sindhi books, partly owing to the efforts of a new society for the encouragement of Sindhi literature.

129. The Deccan Vernacular Translation Society rewarded 22 books, and rejected 26, leaving 52 to be disposed of. Lectures were delivered as usual in connection with the Sassoon Mechanics' Institute and the Dnyan Prasarak Mandali, both of which receive grants. Of the allotment of Rs. 4,000 sanctioned for the encouragement of literature only Rs. 2,438 were spent, certain sums reserved not having been claimed before the end of the year. The whole of the *dakshina* fund except 49 rupees was spent as usual, Rs. 3,138 being paid in rewards to authors or for the purchase of certain books.

130. **Libraries.**—The total number of libraries registered in this office increased from 254 to 270, of which 74 were in the central division, 81 in the northern, 93 in the southern, and 22 in Sind; 207 were in British districts and 63 in Native States.

131. **Donations.**—The Baroda Darbár and H. H. the Nawáb of Sachin have given scholarships worth Rs. 20 a month in the college of commerce and economics. The trustees of the Sir Sassoon David fund gave Rs. 7,000 for the construction of a hostel for Koli boys in the Akola Dángs. The Ghosal memorial fund gave Rs. 3,620 for encouraging poor boys attending the Telang high school, Godhra. Mr. N. M. Tripathi gave Rs. 2,800 for scholarships in connection with the high schools and municipal girls' schools at Nadiád. The committee of the Coronation festival fund of Surat gave a further sum of Rs. 2,000 for prizes for the Surat school children. Mr. Hastimal Shersing of Málegnon gave Rs. 2,000 for a new building for the Maráthi girls' school; and Mr. Gulamalli of Sindkheda Rs. 2,000 for a new building for the municipal Urdu school. Mr. Janmahomed Shaikh gave Rs. 1,800 for prizes for Mahomedan students in the Ahmedabad training college or high school. Sardár T. B. Dave gave Rs. 700 for a scholarship in the Broach high school. Mr. S. M. Karnataki gave Rs. 100 for prizes in the municipal girls' school, Ratnágiri. Mr. Khandubhai Sukhabhai, an assistant in the local board school at At (Surat), handed over Rs. 100 to the district local board for prizes in that school.

132. **The war.**—Some references have already been made to this in preceding paragraphs, especially No. 31. Sir Edward Cook's pamphlet "Why Britain is at war" was translated into the five vernaculars, and copies were widely distributed. Copies were also distributed of a pamphlet containing speeches by the Prime Minister, and of an outline of a lecture or series of lectures prepared under the orders of Government. Some contributions to war funds have already been mentioned. Amongst others may be mentioned a sum of Rs. 363 from the director's office; Rs. 360 from the Poona training college for men; Rs. 537 from teachers in local board and municipal schools in West Khándesh; Rs. 6,741 from various offices and institutions in the northern division. Mr. E. D. Talati, a retired headmaster, gave a series of lantern lectures in that division; and lectures were freely given by inspecting officers at various places. In the southern division too inspecting officers lost no opportunity of talking to the people or addressing them on the subject; and in the Government high schools a series of lectures was delivered. From Sind Mr. Hesketh reports that the total subscribed so far has been Rs. 11,306. The Karáchi high school and the Hyderabad training college have paid subscriptions every month; other schools have also subscribed liberally, but the most noteworthy feature has been the response made by local board schools, as much as Rs. 135 having been received from one. The Sind school paper published a special war supplement four times a month (now reduced to two) without extra charge, for the purpose of disseminating accurate information as to the progress of events.

133. **Plague.**—Plague appeared in all the districts of the central division except West Khándesh, and 14 teachers and 298 pupils fell victims to it. In the northern division Thána and Surat were the chief sufferers, and 7 teachers and 91 pupils died from this cause. In the southern division plague did not work so much havoc as in the preceding year, but still it carried off 12 masters and 216 pupils. At the end of the year the number of schools closed on this account in British districts had increased from 150 to 192; the number of pupils affected was 15,825.

134. **Supplementary tables.**—The six subsidiary forms giving full details of colleges and all kinds of schools are printed in the supplement to this report. The Government of India have decided that educational statistics in Native States shall be excluded from this report; but they are allowed to be shown separately in the tables, the grand totals being given for British districts only.

VII.—IMPERIAL GRANTS.

135. The account given of these grants in chapter VII of the last report is now brought down to March 31, 1915. The only additional grant received during the year was a recurring one of Rs. one lákh. The serial numbers below are in continuation of those given last year; and an asterisk, as before, denotes a non-Government institution.

136. **Eleven lakhs grant of 1911.**—Out of the unspent balance of Rs. 53,246-2-0 shown in paragraph 153 of the last report Rs. 52,047-12-4 were spent by the college of engineering, leaving an unspent balance of Rs. 1,198-5-8. In November 1914 Government intimated that there was a saving of Rs. 15,914 on previous items, thus giving a total unspent balance of Rs. 17,112; it was however subsequently intimated that owing to further expenditure in connection with the secondary training college the balance which is still available is Rs. 8,220 only.

137. **Three lakhs grant of 1912.**—The balance amounting to Rs. 61,783 shown in paragraph 154 of the last report was for convenience dealt with along with the next following grant.

138. **Seven and three-quarters lakhs grant of 1913.**—To this were added the balance of Rs. 61,783 just referred to, and the sum of Rs. 46,501, being the savings in 1912-13 from the Darbár recurring grant of Rs. 48,000 for hostels. Thus for the erection or equipment of hostels we had altogether Rs. 8,83,284. This was allotted as shown in paragraph 155 of the last report, leaving an unpledged balance of Rs. 37,002. The following further allotments have been made:—

		Rs.
(152)*	For an additional dormitory at the Convent school, Karáchi ...	8,484
(180)	For a kitchen, dining hall, and bathrooms for Mahomedans at the Bijápur high school hostel	4,158
		12,642
	Reserved for excess or unforeseen expenditure	24,360
	Total ...	37,002

The actual expenditure from this source has been—

	Rs.
In 1913-14	15,298
In 1914-15	1,10,774
	1,26,072

As the expenditure in the past year exceeds the balance carried over from the three lákhs grant of 1912, the latter may be considered as completely disposed of. The position is now—

	Rs.
Total amount available for hostels	... 8,83,284
Amount expended ...	... 1,26,072
	7,57,212
Reserve still unpledged ...	... 24,360
Amount pledged though not spent	... 7,32,852

139. **Thirty-one lakhs grant of 1913.**—At the end of March 1914 there was a total unpledged balance of Rs. 11,40,957 from this grant, as shown in the last column of the statement in paragraph 164 of the last report. Most of this has now been allotted as shown below.

140. *Grant of Rs. 4,00,000 for arts colleges and secondary schools.*—The unpledged balance shown in paragraph 158 of the last report was Rs. 1,99,845.

		Rs.
(161)	Additional amount required for acquiring land for the Garud high school, Dhulia	2,400
(162)	Temporary arrangements for teaching the new science course in Government high schools	11,054
(163)	Apparatus and chemicals for the new course for standard 7 ...	33,760
(164)	Furniture and equipment for the Dhárwár, Belgaum, and Ratnágiri high schools	4,479
(165)*	For furniture and books for the Nava Vidyalaya high school, Hyderabad	2,333
(166)*	To the D. J. Sind College towards the cost of a gas installation in the laboratories	6,000
(167)	For a site for a new building for the Ratnágiri high school ...	6,000
(168)	Additional library grant to Deccan College	1,000
		67,026
	Reserved for acquiring a site for the proposed arts college at Dhárwár, and for buildings for the high schools at Lárkána, Kárwár, or Ratnágiri ...	1,32,819
		1,99,845

The actual expenditure from this source has been—

	Rs.
In 1913-14	39,802
In 1914-15	1,17,692
	1,57,494

141. *Grant of Rs. 12,50,000 for elementary schools.*—To this was added a sum of Rs. 1,47,821, being the savings in 1912-13 from the Darbár recurring grant. Thus the total amount available for the erection and equipment of vernacular institutions was Rs. 13,97,821, and the balance remaining unallotted from this at the end of March 1914 was Rs. 5,19,340, as shown in paragraph 159 of the last report.

		Rs.
(169)*	Grants to district local boards in the central division	3,35,714
(170)*	Grants to 5 municipalities in the same division	95,662
(171)*	Grants to 11 municipalities in all parts	87,964
		5,19,340

The actual expenditure from this source has been—

	Rs.
In 1913-14	58,569
In 1914-15	1,32,043
	1,90,612

142. *Grant of Rs. 4,00,000 for educational hygiene, etc.*—The balance still unallotted at the end of March 1914 was Rs. 1,71,986, as shown in paragraph 160 of the last report :—

		Rs.
Colleges—		
(172)	College of Engineering, reading rooms and playground improvements...	4,850
(173)	Gujarát College, railings and pavilion	20,000
(174)*	D. J. Sind College for swimming bath	4,250
Secondary—		
(175)	For the libraries in Government secondary schools	11,000
(176)	Part of the cost of certain land required for the Garud high school, Dhulia	13,000

		Rs.
(177)	Ahmedabad high school, reading room	800
(178)	Nadiád high school, gymnasium and playground	5,000
(179)	Godhra high school, playground and garden	6,000
(180)	Broach high school, gymnastic apparatus and playground ...	4,425
(181)	Surat high school, playground	2,850
(182)	Ahmedabad middle school, playground	8,000
(183)	Surat middle school, playground and reading room	6,800
(184)	Government high schools in the southern division for playgrounds, gymnastic apparatus, and games kit	23,429
(185)	Pictures illustrative of geography and history for the secondary training college	200
(186)*	St. Monica's school, Ahmednagar, for equipment and experiments ...	850
(187)*	Woroncoo girls' school, Sholápur, for pictures and playground equipment	550
(188)*	Hopeful Academy, Shikárpur, for playshed and gymnastic apparatus	3,000
(189)*	St. Patrick's high school, Karáchi, for trees, latrines, etc. ...	1,600
(190)*	Poona Camp Education Society's A. V. school for books and hygienic and gymnastic apparatus	1,000
Primary—		
(191)	For improvements at the Poona training college for women ...	1,060
(192)	For the reading room at the Ahmedabad training college for women ...	800
(193)	Additional for levelling the ground at the Dhárwár training college for men	30
(194)*	Grants to the district local boards in the central division for school libraries, gardens, and gymnastic apparatus	31,500
(195)*	Grant to the Surat municipality towards the cost of a playground for the municipal schools	5,000

(197)*	Grant to the Násik municipality towards the cost of a playground for the municipal schools	5,000
Special—		
(198)*	Additional grant to the Indian Y. M. C. A., Poona, for recreation ground	4,192
		1,74,986

The actual expenditure from this source has been—

	Rs.
In 1913-14	28,813
In 1914-15	2,35,459
	2,64,272

143. *Grant of Rs. 1,00,000 for manual instruction.*—The balance unpledged at the end of March 1914 was Rs. 93,944, but the whole of this has been earmarked for introducing the sloyd system into Government secondary schools and vernacular training colleges.

		Rs.
(199)	Part of cost of acquiring certain land at the Garud high school, Dhulia .	3,000
(200)	Estimated cost for three years of the sloyd training class at Dhárwár ...	49,280
(201)	Travelling allowance for the sloyd organizer and his establishment ...	750
(202)	Wall and shed at Dhárwár training college for men	1,062
(203)	Additional for the workshop at Dhárwár training college for men ...	5,808
(204)	Alterations at the Savanur bungalow used for the sloyd training class .	3,866
		63,766
	Reserved for introducing sloyd	30,178
		93,944

The actual expenditure from this source has been—

		Rs.
In 1913-14	... ...	2,500
In 1914-15	... ...	20,668
		23,168

144. *Grant of Rs. 3,00,000 for girls', technical, and special education.*—To this were added Rs. 54,221, being the savings in 1912-13 from the Darbár recurring grant for girls' education, and Rs. 40,002, being the savings in that year from the Darbár recurring grant for technical education. Thus the total amount available was Rs. 3,94,223, from which the balance unallotted at the end of March 1914 was Rs. 29,727, intended for technical education only. This amount is still unpledged. The expenditure from this source has been—

		Rs.
In 1913-14	... ...	2,53,225
In 1914-15	... ...	59,809
		3,13,034

145. *Grant of Rs. 4,50,000 for European education.*—To this was added the sum of Rs. 1,871, being the savings in 1912-13 from the Darbár recurring grant for this purpose, so that the total amount available was Rs. 4,51,871. The balance unallotted at the end of March 1914 was Rs. 1,23,115, as shown in paragraph 163 of the last report.

	Rs.
(205)* Grants for buildings and equipment of various kinds to seven schools at Bombay, Panchgani, Karáchi, Bándra, and Poona	32,029
(206)* Grant to a railway school, Parel	300
(207)* Grants to six schools in connection with hostels	89,500
	1,21,829
Reserved for the Scottish Orphanage, Máhim	1,286
	1,23,115

The actual expenditure from this source has been—

		Rs.
In 1913-14	... ...	10,931
In 1914-15	... ...	1,32,960
		1,43,891

146. The following is a summary of the position of this grant at the end of March 1915 :—

	Allotment and savings.	Expended.	Pledged but not yet expended.	Unpledged.
	Rs.	Rs. a. p.	Rs. a. p.	Rs.
University	2,00,000	2,00,000 0 0	.....	.....
Arts colleges and secondary schools ...	4,00,000	1,57,494 2 5	2,42,506 13 7	.....
Elementary	13,97,851	1,50,611 9 0	12,07,209 7 0	.....
Educational hygiene, etc.	4,00,000	2,64,272 0 0	1,35,728 0 0	.....

Girls', technical and special	3,94,223	3,13,034 4 3	51,461 11 9	29,727†
European	4,51,871	1,43,889 15 6	3,07,981 0 6	.....
Total ...	33,43,945	12,92,469 15 0	20,21,718 1 0	29,727

†Available only for technical education.

The expenditure from the whole grant and the savings added to it has been—

	Rs.
In 1913-14 ...	... 5,93,840
In 1914-15 ...	... 6,98,631
	12,92,471

147. **Recurring grant of Rs. 6,70,000 of 1912 (Darbar grant).**—The total unpledged balance out of this grant at the end of March 1914 was Rs. 1,09,538, as shown in the last column of the statement in paragraph 172 of the last report. Most of this has since been allotted as shown below.

148. *Grant of Rs. 4,36,000 for the elementary education of boys.*—The unallotted balance of Rs. 29,656 shown in paragraph 166 of the last report has been fully utilized.

	Rs.
(208) Equalisation of the inspecting and teaching lines	19,200
(209) Part of the cost of revising the pay of drawing teachers	1,556
(210)* Additional grant to the West Khándesh district local board to meet a deficit	5,000
(211)* Grant to certain district local boards in the northern division to meet the remission of fees	3,900
	29,656

The non-recurring savings available from 1913-14 amounted to Rs. 1,20,091, which were utilized as follows:—

	Rs.
(212)* Grant to the West Khándesh district local board to meet a deficit ...	6,000
Reserved for the extension of the vernacular training colleges for men (in addition to Rs. 1,48,504 reserved for this purpose in the preceding year) .	1,14,091
	1,20,091

The actual expenditure from this source (including non-recurring expenditure sanctioned from savings) has been—

	Rs.
In 1912-13 ...	... 1,61,675
In 1913-14 ...	... 3,15,909
In 1914-15 ...	... 3,34,316

149. *Grant of Rs. 75,000 for the education of girls.*—The unallotted balance shown in paragraph 167 of the last report was Rs. 3,042, to which a sum of Rs. 1,200 was subsequently added, not being required for an assistant in the Hyderabad training college for women (item 124). Thus the amount available was Rs. 4,242.

	Rs.
(213) Housерent allowance to the lady superintendent, Hyderabad training college for women	600
Balance still unpledged	3,642
	4,242

The non-recurring savings available from 1913-14 amounted to Rs. 25,655, which were earmarked for the separation of the Poona training college for women from the high school.

The actual expenditure from this source has been—

	Rs.
In 1912-13 ...	... 20,779
In 1913-14 ...	... 42,345
In 1914-15 ...	... 66,023

150. *Grant of Rs. 48,000 for hostels.*—The unallotted balance shown in paragraph 168 of the last report was Rs. 36,010.

	Rs.
(214) For the Sardars' high school hostel, Belgaum	1,376
(215) Additional for Sátára high school hostel	328
(216) Secondary training college hostel, for hamal and for medical supervision.	504
(217) Additional for Dhárwár training college for men hostel	156
	2,364
Balance still unallotted ...	33,646
	36,010

The non-recurring savings available from 1913-14 amounted to Rs. 35,623 which were utilized as follows.

	Rs.
(218) Initial charges for the Belgaum high school hostel	4,264
(219) Improvements at the Ratnágiri high school hostel	2,756
Earmarked for a hostel in connection with the proposed separation of the Poona training college for women from the high school ...	28,603
	35,623

The actual expenditure from this source has been—

	Rs.
In 1912-13	1,499
In 1913-14	12,376
In 1914-15	17,866

151. *Grant of Rs. 51,000 for technical and industrial education.*—The unallotted balance at the end of March 1914 was Rs. 31,000 as shown in paragraph 169 of the last report.

	Rs.
(220) Revision of the pay of the teaching staff of the School of Art ...	3,180
(221)* Part of the grant to the committee of direction for technical education .	27,220
	30,400

	31,000

The non-recurring savings available from 1913-14 amounted to Rs. 36,031.

	Rs.
(222) Equipment for the Sydenham College of Commerce and Economics ...	17,131
Balance still unpledged	18,900
	36,031

The actual expenditure from this source has been—

	Rs.
In 1912-13	10,998
In 1913-14	14,968
In 1914-15	41,678

152. *Grant of Rs. 40,000 for the education of Europeans and Anglo-Indians.*—No portion of this remained unallotted. The non-recurring savings available from 1913-14 amounted to Rs. 1,061, which is still unpledged. The actual expenditure from this source has been—

	Rs.
In 1912-13	38,129
In 1913-14	38,939
In 1914-15	39,735

153. *Further grant of Rs. 20,000.*—The unallotted balance shown in paragraph 171 of the last report amounted to Rs. 9,830.

	Rs.
(223) Additional teachers for drawing, nature study, etc., in vernacular training colleges	2,750
(224) Part of the cost of an inspectress of girls' schools in the southern division	5,221
(225) Part of the cost of revising the pay of drawing teachers ...	1,859
	9,830

The non-recurring savings available from 1913-14 amounted to Rs. 11,947.

	Rs.
(226) Initial expenditure on the teaching of advanced drawing, nature study, etc., in vernacular training colleges	10,750
Balance still unpledged	1,197
	11,947

The actual expenditure from this source has been—

	Rs.
In 1912-13	
In 1913-14	8,053
In 1914-15	12,763

154. The following summary shows the position of the whole grant of Rs. 6,70,000 at the end of March 1915.

	Allotment.	Recurring amount pledged.	Recurring amount not pledged.	Non-recurring savings not pledged.
	Rs.	Rs.	Rs.	Rs.
Elementary education of boys ...	4,36,000	4,36,000	.....	.....
Girls' education	75,000	71,358	3,642	.....
Hostels	48,000	14,354	33,646	.....
Technical education	51,000	50,400	600	18,900
European education	40,000	40,000	.....	1,061
Additional grant	20,000	20,000	.....	1,197
Total ...	6,70,000	6,32,112	37,888	21,158

The actual expenditure from the whole grant has been—

	Rs.
In 1912-13	2,33,080
In 1913-14	4,39,590
In 1914-15	5,12,381

155. **Recurring grant of Rs. 60,000 of 1912.**—No portion of this remained unallotted. The non-recurring savings from 1912-13 and 1913-14 amounted to Rs. 4,401, which were earmarked for equipment grants to aided secondary schools for Indians.

	Rs.

	88,200

The actual expenditure from this source has been—

	Rs.
In 1913-14	6,800
In 1914-15	31,579

161. *Grant of Rs. 37,000 for technical and special education.*—No portion of this was allotted in the preceding year.

	Rs.
(258) For a special drawing class at Ahmedabad	856
(259) Increase in the pay of the superintendent of pottery at the School of Art	2,400
(260)* Part of the grant to the committee of direction for technical education.	7,780
	11,036
Reserved for recurring charges at the new engineering laboratory ...	21,249
Balance still unpledged	4,715
	37,000

The non-recurring savings available from 1913-14 amounted to Rs. 37,000.

	Rs.
(261) Special grant in connection with the school for deaf-mutes at Ahmedabad	1,300
(262) Initial charges for the special drawing class at Ahmedabad ...	2,600
	3,900
Balance still unpledged	33,100
	37,000

The actual expenditure from this source has been—

	Rs.
In 1913-14	...
In 1914-15	1,170

162. *Grant of Rs. 15,000 for manual training.*—No portion of this was allotted in the preceding year.

	Rs.
(263) Recurring charges in connection with the introduction of sloyd ...	7,496
(264) Establishment for the Sloyd organizer	672
	8,168
Reserved for further expenditure in connection with sloyd	6,832
	15,000

The non-recurring savings available from 1913-14 amounted to Rs. 15,000, which have been reserved for expenditure in connection with the introduction of sloyd. The actual expenditure from this source has been—

	Rs.
In 1913-14	...
In 1914-15	806

163. *Grant of Rs. 45,000 for European education.*—No portion of this remained unallotted. The non-recurring savings available from 1913-14 amounted to Rs. 9,946, which are available for non-recurring grants to European schools. The actual expenditure from this source has been—

	Rs.
In 1913-14	35,054
In 1914-15	42,350

164. The following summary shows the position of the whole grant of Rs. 5,93,000 at the end of March 1915.

	Allotment.	Recurring amount pledged.	Recurring amount not pledged.	Non-recurring savings not pledged.
	Rs.	Rs.	Rs.	Rs.
Primary education	2,76,000	2,76,000	.....	.....
Girls' education	75,000	75,000	.....	.....
Colleges and training ...	50,000	49,836	164	.....
Secondary education ...	95,000	94,960	40	.....
Technical and special ...	37,000	32,285	4,715	33,100
Manual training	15,000	15,000	.....	.....
European education	45,000	45,000	.....	9,946
Total ...	5,93,000	5,88,081	4,919	43,046

The actual expenditure from the whole grant has been—

	Rs.
In 1913-14 ...	... 1,61,970
In 1914-15 ...	... 3,66,372

165. **Recurring grant of Rs. 1,00,000 of 1914.**—In April 1914 the Government of India made a recurring grant of rupees one lákh for the improvement of education generally. This has been allotted as follows:—

	Rs.
(265)* Special scholarships for Mahomedans in secondary schools in Sind ...	20,000
(266)* Grants to district local boards and municipalities for giving code pay to trained teachers	50,000
(267)* Grants to district local boards for additional assistants in undermanned schools	20,000
(268) Inspectress of girls' schools, Bombay and N. D., increase in houserent and carriage allowances, and in the pay of her clerk	1,290
	91,290
Reserved for manual training (sloyd)	5,000
Balance still unpledged	3,710
	1,00,000

The actual expenditure from this source in 1914-15 was Rs. 41,044, which included a sum of Rs. 1,914 on account of charges for excursions in the Government arts colleges.

166. **Summary.**—In paragraph 183 of the last report the balance remaining unspent at the end of March 1914 was given as Rs. 44,55,890. The figures of actual expenditure from the Darbár grant in 1912-13, and from the Darbár grant and the grant of Rs. 5,93,000 in 1913-14 were subsequently corrected from Rs. 2,32,405, Rs. 4,58,793 and Rs. 1,71,203 respectively to Rs. 2,33,080, Rs. 4,39,590, and Rs. 1,61,970. This raised the unspent balance to Rs. 44,83,651. Thus we get for the past year—

				Rs.
			Balance ...	44,83,651
1914-15. Received	(*c*)	6,70,000		
	(*d*)	60,000		
	(*e*)	5,93,000		
	(*h*)	1,00,000		
		...	... ...	14,23,000
				59,06,651
Spent	(*a*)	45,017		
	(*b*)	61,783		
	(*c*)	5,12,381		
	(*d*)	58,890		
	(*e*)	3,66,372		
	(*f*)	48,991		
	(*g*)	6,98,631		
	(*h*)	41,044		
		...	... ...	18,33,109
			Balance ...	40,73,542

The greater part of this balance, however, is as will have been seen from the preceding paragraphs pledged. The only sums remaining unpledged at the end of March 1915 were the following :—

Recurring amounts unpledged.

	Rs.
Darbár grant—	
For girls' education	3,642
For hostels	33,646
For technical education	600
Grant of Rs. 5,93,000—	
For colleges and training	164
For secondary education	40
For technical and special education	4,715
Grant of Rs. 1,00,000	3,710
Total recurring amount unpledged ...	46,517

Non-recurring amounts unpledged.

Grant of Rs. 11,02,000	8,229
Grant of Rs. 7,75,000.—For hostels	24,260
Grant of Rs. 31,00,000.—For technical education	29,727
Darbár grant, savings—	
For technical education	18,900
For European education	1,061
For any purpose	1,197
Grant of Rs. 60,000, savings—	
For aided secondary schools	3,048
Grant of Rs. 5,93,000, savings—	
For technical and special education	33,100
For European education	9,946
Total non-recurring amount unpledged ...	1,29,568

To this last will have to be added the non-recurring savings realized from recurring grants in the course of 1914-15, which have not yet been considered and disposed of. These are roughly as follows—

	Rs.
Darbár grant	2,14,000
Grant of Rs. 60,000	2,463
Grant of Rs. 5,93,000	2,37,697
Grant of Rs. 1,00,000	58,956
Total ...	5,13,116

Supposing that the whole of this is unpledged (which however is not the case), and adding it to the amount of Rs. 1,29,568 shown above as unpledged, we get a total amount of Rs. 6,42,684; so that of the whole balance of Rs. 40 lákhs remaining unexpended at the end of March 1915 not more than 6½ lákhs (and in reality not nearly so much) were available for new allotments. In some cases the schemes for which allotments have been promised have been held over on account of the war; in others it only remains for the parties to whom grants have been promised to make good their claims and to draw the money.

VIII.—GENERAL SUMMARY.

167. The following statement gives the attendance returns for British districts for the last two years :—

Class of Institutions.	Number of Institutions.		Number of pupils.	
	1913-14.	1914-15.	1913-14.	1914-15.
Public Institutions.				
University Education—				
Arts Colleges	7	7	4,057	3,475
Professional Colleges	5	5	1,491	1,557
School Education, General—				
Secondary Schools	440	449	65,973	66,747
Primary Schools	10,970	10,986	659,729	671,986
School Education, Special—				
Training Schools	34	44	2,007	2,105
Other Schools	89	75	5,072	4,732
Total, Public Institutions ...	11,545	11,566	738,329	750,602
Advanced	125	134	4,078	3,437
Elementary, etc.	2,076	1,794	45,823	35,670
Total, Private Institutions ...	2,201	1,928	49,901	39,107
Grand Total ...	13,746	13,494	788,230	789,709

The table shows a decrease of 252 in the number of institutions, but an increase of 1,479 in the number of pupils. In public institutions, that is to say, those under Government inspection, the number of male pupils was 620,864 and the number of female pupils 129,738. The average monthly number on the rolls increased from 718,929 to 731,910; and the average daily attendance from 551,699 to 559,173. The ratio of the average daily attendance to the average monthly number decreased from 76·7 to 76·4. The percentage of all pupils under instruction to the general population of British districts remained 4.

168. General Table III for British districts gives full details as to the attendance in the different classes of public schools, and the figures contrast with those of the previous year as under :—

	Number of schools.		Number of pupils.		Schools.		Pupils.	
	1913-14.	1914-15.	1913-14.	1914-15.	Increase.	Decrease.	Increase.	Decrease.
Government	74	84	17,106	17,425	10	...	319	...
Local Board	7,513	7,562	405,133	417,327	49	...	12,194	...
Municipal	1,111	1,125	143,294	144,953	14	...	1,659	...
Aided	2,527	2,613	149,225	152,670	86	...	3,445	...
Unaided	320	182	23,571	18,227	...	138	...	5,344
Total ...	11,545	11,566	738,329	750,602	159	138	17,617	5,344

During the year under report, ten new institutions were added under "Government," *viz.*, Govardhandas Sundardas high school at Jalgaon, a primary school at Yeravda, a factory school at Sholápur, a factory school at Gadag, and six normal (or rather continuation) classes in the southern division.

169. General Tables VI and V for British districts show the results of public examinations and the stages of instruction in schools for general

education respectively. The number of pupils learning English was 73,444, the number learning a classical language was 30,525, and the number learning a vernacular language was 713,220.

170. The distribution by race of the pupils in public institutions in British districts is given below :—

Year.	Europeans and Anglo-Indians.	Indian Christians.	Hindus.		Mahomedans.	Buddhists.	Pársis.	Others.	Total.
			Brâhmins.	Non-Brâhmins.					
1914-15 ...	5,134	19,896	97,630	485,700	124,752	...	15,789	2,501	750,602

There were 50,700 Lingayat pupils in all classes of public institutions in British districts, *viz.*, 72 in colleges, 669 in secondary schools, 49,811 in primary schools, and 148 in special schools; the number of Jain pupils was 19,122, *viz.*, 187 in colleges, 2,093 in secondary schools, 16,686 in primary schools, and 156 in special schools.

171. The following statement shows the distribution of schools throughout the Presidency. Full details about this are given in the separate tables for British districts and Native States printed in the supplement.

	Area in square miles.	Number of towns and inhabited villages.	Estimate of population.	Number of public institutions.	Number of pupils on 31st March 1915.	Private institutions.	Pupils in such schools.	Percentage of total pupils to population.	Number of villages with schools.	Average number of square miles to each village with a school.
British Districts ...	123,070	23,534	19,680,249	11,866	720,902	1,928	29,197	3	2,639	12·9
Native States ...	66,756	14,901	7,464,516	3,549	212,963	1,031	30,640	3·3	2,561	22·2

172. The total expenditure in British districts from all sources is given in General Tables II and IV, and the figures contrast with those of the previous year as under :—

Year.	Provincial Funds.	Local Funds.	Municipal Funds.	Fees.	All other sources.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1913-14	76,52,428	8,90,064	10,34,650	26,78,903	23,35,026	1,38,91,139
1914-15	82,07,628	9,33,848	11,15,512	27,24,726	24,05,240	1,53,86,993

173. Various percentages are worked out separately in General Table II; and the total expenditure of the year for the British districts is divided between the different funds as under (the figures being percentages) :—

Year.	Provincial Funds.	Local Funds.	Municipal Funds.	Fees.	Revenue of Native States.	All other sources.
1913-14	50·7	6·4	7·4	19·2	0·7	15·3
1914-15	53·3	6·1	7·3	17·7	0·1	15·5

174. In British districts the share which each class of institution has in the total expenditure is as under :—

Year.	Cost of public institutions classed as						Total.
	Government.	Local Board.	Municipal Board.	Aided.	Unaided.	General.	
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1913-14	24,04,508	33,25,311	17,44,060	42,61,517	6,00,003	15,55,740	1,38,91,139
1914-15	24,06,920	38,61,196	18,41,229	51,25,216	5,77,074	15,74,208	1,53,86,993

and again—

Year.	Arts Colleges.	Profes-sional Colleges.	Secondary Schools.	Primary Schools.	Special Schools.	Buildings and Apparatus	Univer-sity.	Direction and Inspection	Scholar-ships.	Miscella-neous.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1913-14 ..	3,51,726	3,37,193	31,00,393	37,39,455	11,10,722	12,68,910	2,55,000	5,37,621	2,01,046	5,66,062	1,38,91,139
1914-15 ..	6,72,120	5,26,064	33,24,211	41,32,499	11,76,763	19,31,718	55,000	7,13,792	2,79,791	5,72,714	1,33,86,993

175. The following table compares the net expenditure from Provincial Funds in British districts for the last two years :—

			1913-14.	1914-15.
			Rs.	Rs.
University Education	...	Arts Colleges ...	2,29,257	3,25,923
		Professional Colleges ...	3,45,212	3,91,251
School Education, General	...	Secondary Schools ...	7,86,691	9,27,214
		Primary Schools ...	30,25,326	33,50,507
		Training Schools ...	2,34,316	2,68,515
Do. Special	...	Medical Schools ...	66,499	69,992
		Other Special Schools ...	3,56,431	3,96,270
Buildings and Apparatus		... ...	10,13,218	14,75,647
University ...		... ...	2,55,000	55,000
Direction and Inspection		... ...	5,81,609	7,13,309
Scholarships ...		... ...	62,765	77,174
Miscellaneous ...		... ...	96,104	1,56,826
		Total ...	70,52,428	82,07,628

The increase in provincial expenditure was therefore Rs. 11,55,200.

OFFICE OF THE
DIRECTOR OF PUBLIC INSTRUCTION,
Poona, 3rd September 1915.

W. H. SHARP,
Director of Public Instruction.

APPENDICES.

APPENDIX A.

EDUCATION—GENERAL TABLE I.

GOVERNMENT OF INDIA.

Abstract Return of Colleges, Schools and Scholars in the British District of the Bombay Presidency at the end of the official year 1914-1915.

(For details see General Table III.)

AREA AND POPULATION.				PUBLIC INSTITUTIONS.							PRIVATE INSTITUTIONS.

* The percentages required for 2 (*a*), 2 (*b*), 2 (*c*) are calculated from the figures given in columns 8*a*, 8*b*, 8*c*, respectively, of General Table IV.

† The annual cost is calculated on the *direct* expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡ The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

§ Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

*The percentages required for 2(a), 2(b), 2(c) are calculated from the figures given in columns 8a, 8b, 8c, respectively, of General Table IV.

†The annual cost is calculated on the *direct* expenditure only. The average cost of educating each pupil is obtained by dividing the direct expenditure by the average number on the rolls monthly during the year.

‡The average cost of each pupil in Local Fund and Municipal Schools is to be obtained from the figures given in General Table VII.

§Fractions of a rupee should be omitted, except in the columns showing the average annual cost of educating each pupil.

BOMBAY: PRINTED AT THE GOVERNMENT CENTRAL PRESS.

Administration Reports.—
Report of the Director of Public Instruction on the progress of education in the Bombay Presidency during the year 1914-15.

No. 3251.

EDUCATIONAL DEPARTMENT.

Bombay Castle, 9th November, 1915.

Letter from the Director of Public Instruction, No. 9874, dated the 6th October, 1915.

RESOLUTION.—The comparative statistics given in the present report regarding the number of educational institutions and scholars in this Presidency are affected by the exclusion for the first time of the figures for Native States. Thus, against the previous year's total of 17,914 institutions with 10,29,017 pupils, only 13,494 institutions with 7,89,709 pupils are registered this year. Taking the figures, however, for British districts only, there has been an actual increase of 1,479 pupils, although the number of institutions was reduced by 252. But this latter decrease was almost entirely confined to private institutions of an elementary character, the numbers for other classes of institutions exhibiting for the most part slight increases. The number of pupils at primary schools rose by 12,000. With regard to the financial results of the year, it may be noted that, out of an increase of nearly 15 lakhs in the expenditure incurred from all sources on public instruction, provincial revenues aided by imperial grants contributed 11½ lakhs, local funds and fees about half a lakh each, municipal funds three quarters of a lakh, and other miscellaneous sources one and three quarter lakhs. Of the total provincial expenditure for the year, amounting to 82 lakhs, a sum of 33½ lakhs was devoted directly to the maintenance of primary schools. There was a notable increase also of four and a half lakhs in the expenditure on educational buildings and equipment.

General results.

2. An event of the year which has, in a greater or lesser degree, affected all collegiate institutions was the pronounced reaction against the lowering of the standard of matriculation which was so unsatisfactory a feature of the examination held in the preceding year. The result was a drop from 58 to 30 in the percentage of successful candidates and a marked departure from the conditions which had recently caused the colleges to be congested by an unprecedented influx of largely immature and unfit students. Another satisfactory development in connexion with this examination was the attention paid by the examiners to the general character of the candidates' work with special reference to its neatness and accuracy. The Governor in Council has recently had occasion to comment, in connexion with the results of the school final examination, on the necessity of combating the tendency to slovenliness and inaccuracy of written work which is a general defect of the pupils in secondary schools and which seriously detracts from their subsequent efficiency in professional life. As against the improvements above noted, however, must be set the fact, which is evident from the great disparity of results in successive years, that the conduct of the matriculation examination still leaves much to be desired from the point of view of uniformity of methods and stability of policy. The Governor in Council understands that the joint committee appointed to formulate a comprehensive scheme for the conduct of this and the school final examinations is approaching the conclusion of its labours, and he trusts that its recommendations, when they come before the University, will receive earnest and sympathetic consideration at the hands of that body.

Collegiate education.

Reference is made in the Director's report to the submission to Government of schemes for a women's college in Bombay, a Sanskrit college at Poona, and an arts college for the Karnatik. His Excellency in Council fully recognizes the

Projected institutions.

desirability of, at any rate, the first two of these projects, but the absence of all prospect, pending the continuance of the existing financial situation, of funds being available for allotment to them, makes it impossible, for the present, to proceed further with their consideration.

Secondary schools.

3. It is a matter for regret that the same cause should have operated to keep in abeyance certain important schemes in connexion with secondary education which had been fully worked out and needed only the provision of funds for their execution. Chief among these are the medical inspection of pupils and the creation of a new inspectorship for Bombay city and the adjacent districts. Nevertheless the Director's report records progress in a variety of directions. Among the measures newly instituted during the year are the revision of the salaries of assistant masters and drawing teachers in Government high schools at a total recurring cost of nearly a third of a lakh, the introduction of Mr. Wren's system of physical drill, the appointment of a wholetime inspector of drawing, the allotment of funds for the development of school libraries, and the expenditure of large sums on the improvement of the educational apparatus of schools, especially that connected with science instruction. At the same time it is impossible, on a perusal of this part of the report, to avoid the conclusion that, if full advantage is to be derived from the expenditure which has of recent years been lavished on school buildings and material generally, a much higher standard of teaching capacity is required on the part of the personnel of the schools. In regard to this point Mr. Nelson Fraser's observations are instructive. The proportion of properly trained teachers, whether in Government or in aided secondary schools, is, it must be admitted, deplorably low, and the most important and pressing need of the future is the organization of measures for ensuring a still larger yearly outturn of trained teachers.

Hostels.

4. In last year's review reference was made to the possible necessity of a reduction in the scale of charges in connexion with the hostels attached to secondary schools, with a view to ensuring their being utilized to their full capacity. From the statement of opinions on the subject recorded in the present report it is to be inferred that the failure of these institutions to secure a full complement of inmates is only partly attributable to the higher cost of living in them in comparison with that of boarding in the town, and that in many cases it is due to the preference which the boys have for the latter mode of life. With regard to this the Governor in Council trusts that parents will recognize the importance of seeing that their boys spend the years of their school life in surroundings which ensure their subjection to wholesome discipline and restraint. While, therefore, he agrees that the charges in hostels must be kept at the lowest possible level, he considers that influence should be brought to bear on the parents, by means of personal communications from the head master, with a view to their insisting on their boys' entering the school hostel, and that, where the conditions are favourable, the experiment should be made of giving the preference in the matter of admission to the school to those boys whose parents undertake to place them in the hostel.

Primary education.

5. Although the financial situation has had the effect of summarily arresting progress in the opening of new schools, considerable advance was made in other directions with the programme for the improvement and extension of primary education. A further recurring allotment of Rs. 89,000 was sanctioned to meet the claims of certificated teachers to special rates of pay; a recurring provision of half a lakh was assigned for the purpose of providing additional teachers in undermanned schools; and further grants, amounting to over five lakhs, were made to local boards and municipalities for school buildings and equipment. With regard to the recent revision of the curricula, it is satisfactory to note that in the opinion of inspecting officers the apprehension that the rural school course is overweighted is not justified; where failure to work up to the new standards occurs, it is attributable to remissness and to inattention to instructions. It will of course be the duty of inspecting officers to see that the teachers in rural schools make themselves conversant with the requirements of the revised standards.

Primary school buildings.

6. The local boards are apparently experiencing some difficulty in utilizing the considerable sums which have been placed at their disposal for building schools, and the progress recorded in this direction is distinctly disappointing. In the Southern Division, however, the difficulty is being met by the loan of the services of officers belonging to the Public Works Department for the special purpose of designing and constructing school houses, and the same course has been followed in East Khandesh. Much delay has undoubtedly been caused by the obligation to refer all plans to the sanitary authorities. But a complete set of fairly detailed instructions as to the hygienic and sanitary requirements to be complied with in the construction of different types of school buildings has recently been issued, and this should greatly facilitate the task of school managers. Having regard to the great variety of local conditions and requirements, it is doubtful whether the preparation by a special officer of a set of type designs would satisfactorily solve the problem. With regard to the question of the duration of buildings, it may be observed that a cheap and temporary form of construction is not incompatible with observance of the principles laid down by the sanitary authorities in the matter of orientation, lighting, and ventilation.

Female education.

7. Owing to the exclusion from the present report of the figures for Native States, no comparison is possible between the total numbers for the past and the previous year of girls under instruction, but it is evident that there has been a substantial increase of attendance both at secondary and at primary schools. An interesting development in connexion with girls' education was the holding of a course of instruction in physical training for the benefit of teachers in the Bombay girls' schools. Considerable sums were spent on special objects connected with girls' primary schools, and the newly founded scholarships are reported to have been productive of encouraging results. The question of the best way of utilizing the grants intended for the teaching of sewing appears to call for attention.

Mahomedan education.

8. One of the most important questions connected with the education of Mahomedans continues to be that of the language which should be used as the medium of instruction in primary schools, whether Urdu or the local vernacular. Last year, at the Mahomedan educational conference, an emphatic opinion was recorded by those present in favour of the general introduction of Urdu standards, and the report which has recently been submitted by the committee appointed to frame proposals for the advancement of Mahomedan education contains a number of recommendations designed to give effect to this policy. From the reports of officers who have personally sounded local Mahomedan opinion, however, it appears that the community is by no means unanimously in favour of the Urdu standards, and that there exists in many parts a strong feeling against their adoption. Their introduction into the special Mahomedan schools will have to be proceeded with cautiously and tentatively. The temporary appointment of an inspectress of Urdu girls' schools in the Central Division has completely justified itself and has now been made permanent; the number of schools under the inspectress is increasing rapidly. Similar satisfactory results have followed the appointment of a special deputy inspector for the Mulla schools in Sind. In some quarters complaint is made as to the unsympathetic attitude of the local municipal authorities towards the development of education among Mahomedans. The Governor in Council trusts that the municipalities will everywhere recognize their obligation to extend to this section of their constituents the educational facilities which its special circumstances and requirements call for and which it has an unquestionable right to expect.

Special instruction.

9. The secondary and primary training institutions continued to do good work during the year. The Governor in Council notes the satisfactory results which are being obtained from the experimental training class for teachers in the aided schools at Poona. In view of the urgent need, referred to in a previous paragraph, of improvement in the standard of tuition in secondary schools, he desires that the question of applying the experiment to another educational centre should be considered. From the interesting summary given by the Director of the first report of the Inspector of Drawing it is evident that the methods of

teaching this subject stand in need of drastic revision. He trusts that a beginning will be made in this direction by making good the deficiencies noticed in the system of training in the normal class of the School of Art. With regard to the introduction of manual training in selected high schools, it is a matter for regret that various causes have contributed to impede progress and that the present curtailment of funds makes it necessary to restrict very considerably the scope of this innovation. The organization of the teaching and equipment at the Sydenham College of Commerce and Economics made good progress during the year.

Administration and miscellaneous.

10. The scheme for relieving the inspectors by providing them with personal assistants, the introduction of which was foreshadowed last year, has now been brought into effect. At the same time the clerical establishments of both inspectors and their deputies have been strengthened. These officers will thus be able to devote more time to their duties of actual inspection. The prospects of promotion in this branch of the service, which hitherto compared unfavourably with those in the teaching line, have been materially improved by the creation of a certain number of better paid posts. With regard to the subject of visual training, the Governor in Council has read with interest the Director's statement of the effect produced on the relations between educational officers and the people by the lantern lectures delivered by the former in the villages which they visit on tour. Judiciously utilized, the opportunities for intercourse thus afforded cannot fail to have a beneficial effect. The preparation of lantern slides to illustrate lectures on the causes and prevention of the more common diseases is in progress.

Conclusion.

11. The acknowledgments of Government are again due to the Hon'ble Mr. Sharp for the ability and zeal which he has continued to bring to bear on the administration of the Department in his charge. His Excellency in Council notes with pleasure the special commendation which Mr. Sharp bestows on the work of individual officers serving under him. At the same time he fully recognizes that credit is due to the Department as a whole for the results achieved during the past year, which has been one of progress and development in all branches. The obligation imposed by the present financial situation to practise strict economy in every department of the administration is placing severe limitations on the extension of activities and the initiation of new enterprises in the field of education. But the resultant state of affairs is not without its compensatory advantages. The advance in educational work has been so rapid of recent years that a period of suspension which will afford opportunities for the examination of methods and results and the consolidation of achievement may prove generally beneficial. His Excellency in Council is confident that, notwithstanding these altered and, perhaps, somewhat uninspiring conditions, he need apprehend no relaxation of effort or diminution of enthusiasm on the part of the officers of the Department.
